New Foreign Exchange Student Arrives for Year at China Lake By Richard L. Hayes

1958, was among the 80 students who found themselves standing on the runway at Burbank Airport with no one to greet them.

The mixup occurred last Wednesday morning when the plane, chartered by the American Field Service, arrived one full hour ahead of schedule

Peter, as he wishes to be called, was among the more fortunate because the K. H. Robinson family, which will host Peter during his stay, also arrived early and after the handshakes and greetings rought Peter to China Lake Wedesday afternoon

Peter's trip from his home in the Spanish port city of Barcelona started with confusion much more serious than his few anxious momrailroad which was to carry the 30 Barcelona foreign-exchange stuspend more than 12 of their 36 hours on the train standing.

In Rotterdam, Peter boarded the French steamship Arosa Sky, which made a routine trip across the Atlantic. The Arosa Sky entered New York Harbor the evening of August 12, but the students were not allowed to leave the ship until after medical examinations were completed in an effort to check the pread of Asiatic flu.

Peter was luckier than most of he students inasmuch as his couin, Fredrick Rohala who will enclasses this fall in Vermont, was able to accompany him on all but the last leg of his trip.

The most striking of the many sights encountered, by Peter was the night entry into New York past. the Statue of Liberty and the Manhattan skyline. Besides the sights, Peter has already become acquainted with the American specialities like hamburgers, milk shakes, and corn on the cob.

Peter will attend Burroughs High School as a senior this year. Although he has been here only a week, he has met many of his fu- Exchange student, Judy Wilson, ture classmates, and would like to writes to her parents, Mr. and Mrs. Recently reporting aboard for thank everyone for his friendly re- H. Since none of us have eyes in the back of our head, we are compelled to turn around to see where we are going when we back a vehicle. But some of us don't! Many of us thoughtlessly jump into the car, throw it in reverse and start backing without looking. Some of us are more thoughtful. We peck on the horn button a couple of times hoping that everybody will hear and In spite of all the ultra modern automatic gadgets on our modern cars, they are not yet equipped to move out of the way by themselves. Somebody has to move them. And if they're parked, whether properly or improperly, it is your responsibility to back without hitting them. The Commandant of the 11th ND has issued a notice to the effect that military and civilian drivers of government vehicles are costing the
