U.S. NAVAL ORDNANCE TEST STATION
China Lake, California
From Mule Team To Research Center

Instead of the sharp crack of the mule skinner's whip that echoed up and down the 1760-square-mile area of the U. S. Naval Ordinance Test Station today, you will hear the quiet drone of the U-2 and B-57 Canberra planes as they buzz by the notorious 28,000-mule train that once echoed up and down Mule Team Valley. The baying of the mule that has been successfully proven in combat. Also, you will see a demonstration firing of a development program, situated at the SNORT facility.

Polaris test missile launched from below the surface by a prototype of the submarine launching system, then propelled on a short controlled-flight. Facility is located at San Clemente Island.

The NOTS Worker

He is a man who has lived much in the sun. His face a character study in deep lines and scars, a relief map etched by thousands of years of hard work. Yes, too, he is a man of prolific talk, and good will. "Though a mnemonic in egg, he is off independent as Smokey Smith."

He is perhaps 30, 40, 50 years of age; maybe 60 and up may not be as good a rule. On his face, his savviness and know-how is often the admiration of his fellow workers—his is the NOTS hard-hat spirit, a technically trained worker, a good engineer, technician, electrician, mechanic, truck driver, range guide, etc.

Our Mission And Activities

The principal objective of NOTS Pasadena is to plan and develop new missile propellants and explosives, as well as to perform research and development in the field of underwater ordnance, including complete torpedoes and mine warfare systems. In the past, NOTS has carried out ordnance development through the use of prototypes and torpedoes with new ordnance components. Most of the new ordnance development has been carried out in the laboratory. In addition, NOTS has also been responsible for the testing of new ordnance components and weapons systems, including complete torpedoes and mine warfare systems. In the past, NOTS has also been responsible for the testing of new ordnance components and weapons systems. In the past, NOTS has also been responsible for the testing of new ordnance components and weapons systems. In the past, NOTS has also been responsible for the testing of new ordnance components and weapons systems.
Newly Promoted Captain Brooks Will Serve as Executive Officer

Captain Oliver Brooks, Assistant Executive Officer for the U.S. Navy's Nurse Corps, has been selected as the next Executive Officer of the U.S. Naval Hospital in San Diego. His appointment is effective on May 31 and will be announced at the usual change of command ceremony. Commander Frank E. Hoff, the current Executive Officer, will assume his duties in a new capacity within the hospital.

The selection of Captain Brooks is a significant milestone in his career. He has served in various capacities within the Navy Nursing Service, including as a Head Nurse and as a Nurse in charge of the Operating Room. His expertise in patient care and management has earned him high praise from colleagues and superiors. His leadership qualities and dedication to service have made him a strong candidate for this position.

Captain Brooks will lead the Medical Services Division and the Armed Forces Nursing Service, ensuring the highest standards of care for the patients in the hospital. His commitment to patient welfare and his ability to manage complex situations will be crucial in his new role.

The hospital is located in San Diego, California, and serves as a primary care facility for military personnel and their families. Captain Brooks will work closely with the Commanding Officer, Captain John H. Thomson, to ensure a smooth transition of responsibilities.

---

EVALUATION TEAM — Army and Marine Corps

Two officers and one enlisted person from the Army and Marine Corps who served in the U.S. Navy during the years 1953-1955 will be present to observe the activities of the U.S. Naval Hospital in San Diego. The officers are Lieutenant Colonel G. W. W. Belcher, Assistant Chief of the Army Medical Service; Captain D. G. Brown, Assistant Chief of the Marine Corps Medical Service; and Captain J. W. Johnson, Assistant Chief of the Navy Medical Service. They will be present during the month of June.

NOTS Apprentices Graduate Next Week

The U.S. Naval Hospital in San Diego will graduate its next class of NOTS Apprentices on June 1. The NOTS Apprentices are training to become notaries public and will be sworn in as such after completing their training.

NOTS Navy Nurses Observe 52nd Anniversary

The Navy Nurses Association will celebrate its 52nd anniversary on June 1 with a series of events. The association was founded in 1949 to support and advocate for nurses in the Navy. The celebration will include a luncheon, a guest speaker, and a special recognition ceremony for distinguished members.

UCRA Professor Will Speak Before ASPA

Professor William A. Urella, Jr., a well-known author and speaker in the field of communications, will be the guest speaker at the annual meeting of the American Speech-Language-Hearing Association (ASPA) on June 10. The meeting, held at the Hyatt Regency Hotel in San Diego, will focus on the latest research and developments in the field of speech-language pathology and audiology.

Army and Marine Units Evaluate New Weapon

The U.S. Army and Marine Corps have evaluated a new weapon system designed to improve their capabilities in close combat. The system, known as the "Combined Arms Weapon System," consists of a light machine gun, a grenade launcher, and a rocket launcher. The evaluation was conducted in a live fire exercise at the Marine Corps Base in San Diego.
