

U.S. NAVAL RESERVE CONSTRUCTION BATTALION DIVISION 11-2

LOCAL YOUTHS TO LEAVE FOR TRAINING—Four China Lake youths, one Trona youth, and one West End youth will leave tomorrow for accelerated recruit training at San Diego. Shown in front row (l-r) are: David Rivera, Douglas Blew, and Joseph Alpert. Back row (l-r) are: Richard Barker, Harvey Creech, Joseph Ennis, and Arthur Schultz. All are members of the local SeaBee unit.

Local Youths Leave For Training at San Diego

Seven youths from the Indian Wells Valley will attend Accelerated Recruit Training at the Naval Training Center in San Diego this month, according to Cdr. Irwin I. Shull, Commanding Officer of the Naval Reserve Construction Battalion Division 11-2. The training period is 30 days in duration, and will commence on June 13. The young men, recently enlisted as members of the Reserve Seabee Division, include:

Joseph L. Alpert of China Lake, who is a Senior at Burroughs High School. Alpert plans to enroll at Bakersfield Junior College in September where he will study pre-engineering.

Richard J. Barker of Trona, is a Senior at Trona High School and plans to pursue an engineering course at San Diego State College this fall.

Douglas O. Blew, a Senior at Burroughs High School will enroll at the University of California, Santa Barbara in September to study physics.

Harvey O. Creech of China Lake, is a Junior at Burroughs. He plans to perform two years of active duty with the Navy after completing high school.

Joseph P. E. Ennis, is also a Burroughs High School Junior, and plans to perform two years of active duty with the Navy following graduation from High School.

David A. Rivera, Jr., another BHS Junior, will join Creech and Ennis in two years of active duty next summer following their High School graduation.

Arthur C. Schultz, Jr., of West End is presently a Junior at Trona High School. Schultz plans to attend college after completing High School.

Two other Division members that will report to San Diego for Recruit Training later this summer are:

Lewis E. Lusher, a graduate of Burroughs High School now residing at China Lake. Lusher was to accompany the group to San Diego for Recruit Training, but was forced to postpone the training when he recently underwent emergency surgery. Following his Recruit Training, Lusher will perform two years of active duty.

Winfred E. Wyatt, of China Lake, is also a Junior at Burroughs High School. After graduating

VX-5 OFFICER — Lt. Edward C. Copeland reports to VX-5 to work with Weapons Effects from two years at the Naval Postgraduate School at Monterey where he obtained his masters degree in physics. He is an associate member of the Society of the Sigma Xi and a graduate of Naval Academy at Annapolis, Md., class of '54. His wife, Isabelle, and their three children plan to join him in July.

Thinking Man's Answer

By Tarsal B. Fracto

Pardon me, sir, what kind of shoe are you wearing over that smashed foot?

I'm wearing a plain, ordinary lousy tennis shoe because it's comfortable on the job and soaks up the blood good when I bash the heck outta my feet.

In other words, you are not wearing a safety-toe shoe.

No, darn it, I'm not! Are you in charge of this job?

No, I'm just a jerk who happened to be standing in the way when the weight fell and mashed my foot.

Do you think everybody should be a jerk?

No, I think that everybody should decide that for himself. But I do think that everybody oughtta let the Navy decide when and where safety shoes should be worn. That's something a jerk can't figure out for himself.

—Miramor Jet Journal

Players Tag Variety In Festival Dramas

"A Summer Drama Festival" which closes tonight at the Murray School Auditorium, unveils gaiety, satire, and romance in three one-act dramas presented by the China Lake Players. "This evening . . . is a chance for a larger number of our actors to have fun with a role and is a dividend of entertainment for our audience," says Mary Wickenden, president of the community theatre group.

The curtain will rise at 8:15 p.m. on "Going Home," a comedy directed by Roger Wickenden, about the departing guest who resolutely refuses to depart. The cast includes Norm Van Zandt, Joan deGroot, Ritarae Harris, Dell Hughes, and Teena Wilkie.

Debut at Bakersfield
The romantic drama of the evening will be "Boccaccio's Untold Tale" which is directed by Phil Marsh and was the Players' entry in the Kern County Drama Festival. It was presented twice in Bakersfield.

The action of the play is laid in Florence in the year of the Great Plague and various members of the Players will serve as processions bearing the dead. Gary Wydra, Rosalie Lindblom and Betty Kruk will play the leading roles. Supporting roles are handled by Marquerite Pezzuto and Phil Marsh.

Witty Discourse

After the intermission "Another Way Out," directed by Ruth Rekosh, will end the evening on a note of humorous satire of the nonconformist outlook. When does the ideal free union become just the same as a marriage is the question posed by John Chatfield as the writer with advanced notions, and Susan McCann who emerges as a sculptress devoted to her art. Betty Hughes, Robert Martin and Ruth Rekosh complete the cast.

Tickets, priced at fifty cents, will be available at the door. Refreshments will be served during intermission for a social evening of informal theatre.

PLANTING CORN

When the Pilgrims planted their first crop in the New World, friendly Indians taught them to bury a fish with each seed of corn, a primitive but effective fertilizer.

Supervisor's Guide

Benny Sugg Program Strong Factor In Station Employee Team Morale

THE BENEFICIAL SUGGESTION has a solid impact on team morale. It stimulates upward communications. It gives supervisors a chance to judge the intelligence and initiative of their people and shows they are building a feeling of personal responsibility for the success of the enterprise in each individual. It convinces the employee that his supervisor wants his ideas, that they will be carefully considered, and they will be put to work if they have merit.

The success of a formal suggestion system depends entirely on the supervisors who administer it. If they think the program brings more headaches for them than headwork from the employees, that 99% of the suggestions are worthless anyhow, that there is too much paper work involved, that checking out suggestions and explaining to employees why they are not acceptable takes up too much time, the suggestion system will bog down in apathy regardless of the generosity of its rewards.

To keep suggestions moving upward, supervisors should use the following guide:

1. Be receptive. If you're impatient, bored, too busy, or just plain indifferent, you build a wall between yourself and your people. If you offer them the encouragement of your interest and the reward of recognition, you'll get good suggestions.
2. Don't expect too much. Most suggestions concern minor improvements. Don't write them off while you wait for the "large" idea. The suggestion that's a big-time money-maker or money-saver may never come if you throw away all the little ideas.
3. Be specific when you turn down a suggestion. An employee is entitled to an explanation as to why his idea won't work. This may take investigation on your part, but you'll learn more about your job. Also, the employee will be appreciative.
4. Be helpful. An employee may not have your technical skill or even the language to write up his suggestion properly. If you work with him and give him credit for it, he'll give you credit for being a topnotch boss.
5. Be patient. Never ridicule ideas, even if they are ridiculous. The employee is personally entitled to courtesy. You don't want to hurt upward communications by stipulating you will listen to superior suggestions only. You may not get any.
6. Don't expect all suggestions to be job related. Most employee suggestions concern working conditions, but that's to be expected. Everybody can tell you why it would be nicer to use cloth towels instead of paper ones in the lavatory. Suggestions of this kind do show employees are interested.
7. Look for the related idea. Maybe the employee's suggestion isn't practical, but triggers another idea in your mind that's very useful. If so, give him credit for his help.
8. Don't take suggestions for granted. This point of view is a suggestionkiller. It's only human to want credit and public recognition.
9. Encourage suggestions to build enthusiasm. The work a man produces on what he knows and how much effort he makes. You encourage him to make the "college try" when you encourage his suggestions.
10. Give credit freely. Credit generously given brings you a high return in worker loyalty. The credit an employee gets won't be at your expense. You recognized his idea and pushed it. That's the management job.

To Northwestern

RECEIVES GRANT—Dr. Thomas W. Milburn left this week to participate in the graduate program at Northwestern University.

suggestions only. You may not get any.

NOTS TOURISTS—An annual all-day tour of NOTS facilities for members and guests of the Ridgecrest Chamber of Commerce and the China Lake Community Council was conducted Thursday, June 8. The 25 visitors are shown witnessing a VX-5 aircraft bombing demonstration at C-Range.

Vol. XVII, No. 24 NAVAL ORDNANCE TEST STATION, CHINA LAKE, CALIFORNIA Fri., June 16, 1961

Dr. Milburn Accepts Research Associate Bid at Northwestern

Dr. Thomas W. Milburn of the Weapons Planning Group will work as a Research Associate this summer in the graduate program in International Relations at Northwestern University.

Supported by Carnegie Foundation funds, he will be involved in some experimental research, but will direct his efforts mostly to the completion and publication of articles and monographs on the subject of how we might most effectively dissuade Red China and the Soviet Union from military aggression.

Project Michelson, a several-faceted study of the theory of deterrence, has been conducted at NOTS under Dr. Milburn's direction. Through contractual procedures which draw the services of university personnel, political and psychological data is evaluated by the Navy and utilized to develop and investigate various methods for the use of weaponry and other means of influencing nations.

Aetna Agent Due At NOTS June 30

Howard Keenan, outside claims representative for the Aetna Casualty and Surety Company who serves the Governmentwide Indemnity Health Benefit Plan, will be at NOTS all day and early evening on June 30.

Enrollees in the plan who have individual problems may consult with him at that time. Personnel with complicated cases may contact Austin Ross, Head of the Employee Management Relations Division, Personnel Department, so that the Aetna representative may be advised to bring their case records from the Oakland office.

No appointments will be made in advance. The office where Mr. Keenan will be located during his visit to NOTS will be announced later.

Pack Trip Info

Information is now available at the Community Center receptionist counter on High Sierra pack trips. Types of trips, costs, equipment needed, and locations of pack stations are included in brochures published by the Eastern Sierra Packers Association.

FIRST MARRIAGE LICENSE—Risè Noto (r), newly appointed Deputy County Clerk, issues the first marriage license locally to Judy Blust and Arthur Warnock who will be married in Vista, California tomorrow. The new community service will be administered from the Ridgecrest Chamber of Commerce office in the County building where Risè Noto serves as the C of C executive secretary.

Wedding Licenses Now Issued Locally

Risè P. Noto, executive secretary of the Ridgecrest Chamber of Commerce, was certified last Friday, June 9, by County Clerk Vera K. Gibson, as Deputy County Clerk for this area.

According to Miss Gibson, Risè Noto is the first person to be deputized to issue marriage licenses outside the Civic Center in Bakersfield within Kern County.

The appointment was made at the request of the Chamber of Commerce for the convenience of residents in the China Lake, Ridgecrest, Inyokern and Randsburg areas as well as Kernville.

This new local service will eliminate the necessity of east Kern County residents driving to the county seat in Bakersfield for marriage licenses. Licenses will be issued at the county building in Ridgecrest from 9 a.m. to 4:30 p.m. each week day.

Risè was recently elected first vice-president of the Kern Desert Business and Professional Women's Club in Ridgecrest.

Telephone Business Office Closed
From 11:30 a.m. to 12:30 p.m.

Station Hosts Ridgecrest Chamber of Commerce

A twenty-five member group of business men from the Ridgecrest Chamber of Commerce and members of the China Lake Community Council spent a full day touring the Station last Thursday.

The tour which has become an annual event provides the merchants of Ridgecrest a first hand look at the Station's operations. As one Chamber of Commerce spokesman stated, "As members of the twin communities of Ridgecrest and China Lake, it makes us aware of the vital work the Station is doing, and its contributions to the national defense."

"Through the medium of these tours we get to know you of China Lake better and you to know us—it fosters better inter-community relations."

The tour also provided a number of the Chamber of Commerce visitors an opportunity to meet Capt. Blenman for the first time since he assumed command of the Station on June 1.

A registration and bus transportation center was set up at the Officers Club for the visitors. Assembling there at 9 a.m. the visitors were given tour badges and packets containing a program of the day's events, brochures describing the work performed by various departments of the Station.

On completion of registration, the visitors assembled for the formal introduction of Capt. Blenman by John Cox, president of the Community Council. Following his introduction, Capt. Blenman extended his welcome to the group, and outlined briefly the role the Station plays in the ordnance and research field.

Referring to the film "Expanding Frontiers in Ordnance" the tour of Charlie Range where they visitors were to see, he commented, "It will give you visual evidence of the work we do here at NOTS."

Following viewing of the film, the visitors boarded buses for a witnessed loft bombing demonstration by Air Development Squadron Five pilots. As each pilot came in for his delivery the maneuver was described for the visitors by Duane Mack, Head of Charlie Range Operations.

After the loft bombing demonstrations the visitors boarded the buses for a tour of the Guided Missile Ranges while enroute to the Officers Club for lunch. Following lunch the visitors boarded the buses again for a tour of the SNORT track facilities and to witness a routine test. Commentary during the test was furnished by L. G. (Red) Garman, Head of the Supersonic Track Division, after which they were shown documentary films of test work performed on the 4.1-mile track.

A tour of Michelson Lab concluded the day for the visitors. **New Navy Weapon Praised by Stroop**
The Navy has a new, long-range antisubmarine weapon system under development—"DASH" (Drone Antisubmarine Helicopter). This drone would provide a destroyer equipped with DASH a long-range striking capability heretofore unknown in surface escort antisubmarine warfare. The drone is a compact, coaxial-rotor, weapon-carrying helicopter designated Model DSN-1, and is developed and produced by Gyrodyne Company of America, Inc., of St. James, Long Island, New York.

Rear Admiral Paul D. Stroop, Chief, Bureau of Naval Weapons, under which the DSN-1 was developed, today said, "Recently completed tests at sea have proved the feasibility of the DASH weapon system concept which was initially conceived in 1958 to offset the submarine threat. During these tests, a total of 38 flights were flown, including 22 missions from the USS Hazelwood, utilizing one DSN-1 drone."

On August 12, 1960, the DSN-1 made the world's first free flight of a completely unmanned drone helicopter at the Naval Air Test Center, Patuxent River, Maryland.

Modern destroyer sonar gear can pick up a submarine many miles away and determine the surface, at which point the submarine is not apprehensive of attack. The addition of a drone helicopter will extend a destroyer's attack capabilities virtually to the limit of its sonar range and will enable the destroyers to strike at the submarine with homing torpedoes long before the submarine has begun to expect hostile action.

The destroyers for the DASH weapon system are being modernized under the U.S. Navy FRAM (Fleet Rehabilitation and Modernization) Program. A heated hangar, capable of housing two drones with associated support equipment is provided immediately aft of the destroyer's after stack. A landing area is provided aft of the hangar. The shipboard guidance equipment

THOUSANDS WILL SEE—NOTS-developed hardware is on display for the thousands attending the Kern County Fair in Bakersfield. TID Presentations Division's prepared exhibit features ASROC, a 15 foot homing torpedo, Sidewinder, a 9 foot air-to-air guided missile, and Zuni, a five-inch high-velocity rocket. Attendance at the nine-day exposition, which began last Friday and ends this Saturday, is expected to exceed 225,000. NOTS men manning the exhibit are Ray Sinnott and Fred Richards with the assistance of members of the Navy Recruiting Station at Bakersfield.

CAPEHART PLAN "C"—Pictured above is an architect's sketch of a three bedroom duplex unit with single garage attached, to be erected at Site "B."

Community Council Passes Resolution on Hospital

At the China Lake Community Council meeting last Tuesday, correspondence was introduced which indicated that a favorable climate prevailed in regard to the proposed community medical center. John L. Cox, Council President, expressed satisfaction with the manner in which recommendations have been presented and are being considered by the Community Hospital Association and the Ridgecrest Hospital Advisory Council toward establishment of a voluntary nonprofit hospital for the Indian Wells Valley.

Dr. Drummond's letter of June 6 to Donald Moore, President of the Desert Community Hospital Association, indicated that the Ridgecrest Hospital Board of Directors would consider relinquishing control of the existing facility if sufficient evidence could be provided that the currently constituted Community Hospital Association is able to undertake the trusts and responsibilities incumbent upon such an advisory council.

The China Lake Community Council endorsed the concept of a community hospital in principle with the following resolution:

WHEREAS the Desert Community Hospital Association has been seeking means for augmenting local medical services either through construction of new facilities or through negotiation with the Ridgecrest Hospital for the use of these facilities as a community hospital; and

WHEREAS the Ridgecrest Hospital appears amenable to the idea of the Community Hospital provided certain criteria are met relating to the confidence of both the people and the medical profession in the hospital establishment and with respect to perpetuation of these services; and

WHEREAS the China Lake Community Council sees in the aims and purposes of both these organizations the opportunity for real gains for the community; Therefore be it

RESOLVED, that the Board of Directors of the China Lake Community Council offers its support to the Desert Community Hospital Association to explore and develop criteria, with the Ridgecrest Hospital, for establishing confidence and trust on the part of the community and the medical profession in a Community Hospital concept for the purpose of proceeding toward implementation of this concept.

RAFT CLUB ISSUE NOT RESOLVED

Several interested citizens attended the meeting to voice support for continuance of the Raft Club facility. It was agreed that the Community Council would seek further information from Club members and their parents regarding their willingness to pledge future support of the youth center.

The primary objective is to ascertain whether individuals are sufficiently concerned to obtain a responsible body for the purpose of conducting policy board management and investigate means for financial assistance as a community enterprise. Constructive suggestions are solicited.

PRECINCT 6 REPRESENTATIVE

Howard J. Viellenave, scientific staff assistant in the Test Department, has been elected representative for Precinct 6. He has been a NOTS employee since July 1951.

Promotional Opportunities

Present Station employees are encouraged to apply for the positions listed below. Applications should be accompanied by an up-to-date Form 58. The fact that positions are advertised here does not preclude the use of other means to fill these vacancies.

Electronics Mechanic, GS-10 to GS-24 p/h, Code 5073—Tests, repairs, calibrates, modifies and installs electronic and electro-mechanical equipment which go together to make up the electronic analog computer installation. Also, the designing and building of new electronic and electronic circuits and equipment as may be needed.

Mechanical Engineer, GS-9, PD No. 13894-1, Code 5552—Production and value engineering and design of mechanical components for development and prototype rocket and missile systems and related ordnance items, and the preparation of drawings and documents for use in large quantity procurement.

Mechanical Engineer, GS-9, PD No. 13894-2, Code 5552—Production and value engineering and design of mechanical components for development and prototype rocket and missile systems and related ordnance items, and the preparation of drawings and documents for use in large quantity procurement.

Stock Control Clerk, GS-4, PD No. 14615-Antl, Code 2573—Supervises employees engaged in the preparation and distribution of all procurement documents.

Freight Classification Assistant (Typing), GS-5, PD No. 02590, Code 2581—Performs typing and clerical duties for the Shipping Branch. Must have a knowledge and understanding of receipt and expenditure of invoices, ammunition issue order, request for shipments, rejection notices, sub requirements, Government and Commercial bills of lading, transportation requests, Navy Shipping Guide and freight classification tariffs.

Inspector (General Equipment), A, \$2.89 to \$3.13 p/h, Code 2553—Perform inspection as to the quantity, quality, and condition of purchased material in conformance with existing specifications. Uses such working devices as micrometers, calipers, inside and outside counting scales, feeler gauges, wire gauge and volt and ohm meters.

File applications for above positions with Fawn Haycock, Room 34, Personnel Building, Ext. 7-2022.

General Engineer, GS-13, PD No. 31747, Code 4535—Head, Analysis Branch. Provides mathematical and physical services for performing parametric analyses and solving en-

gineering problems. Design of experiments and statistical analysis of data and computer service for data processing, assessment and programming engineering problems. Persons with background in Physics or engineering will be considered.

Clerk-Stenographer, GS-4, PD No. 065010, Code 6521—Position is in the Recruitment Branch of the Employment Division. This Branch is concerned with the procurement of all classes of employees for the Station. Performs stenographic, clerical and typing functions under the general supervision of the Branch Head.

Auditor, GS-12, PD No. 18527, Code 177—As Assistant Head of the Internal Review Division, makes independent reviews and reports relative to effectiveness and economy of station financial and operating responsibilities. Including non-appropriated fund activities. This position may be filled at the GS-7, 9 or 11 level to provide for training.

Employee Management Relations Specialist or Assistant, GS-7, 9 or 11, PD No. 065013, Code 654—The position is that of Assistant to the Head, Employee Management Relations Division. The purpose of this position is to perform technical employee relations and employee services tasks and to provide training in employee management relations.

Secretary (Steno), GS-5, PD No. 100001, Code 00—Assistant to the Aide to the Commander, provides secretarial services in the Office of the Commander, including reception of visitors and telephone calls, arranging for hospitality and secretarial assistance for high level civilian and military visitors, taking and transcribing dictation and assuming full responsibility for the office during the absence of the secretary to the Commander.

Joiner, \$2.93 to \$3.17 p/h, Code 4553—Constructs, installs and repairs furniture, fine cabinet work, models or mock ups, and similar items, requiring precision shaping, fine fitting, mortising and tenoning, dovelling, steam bending, turning and molding of its regular shaped parts.

Management Technician, GS-7, PD No. 117005, Code 174—Participates in the operation of the directives and paper work management program including the organizational manual, code directory and station history. This position may be filled at the GS-5 level to provide for training.

Secretary (Steno) or Secretary (DMT), GS-5, PD No. 001004, Code 01—Secretary to the Consultant to the Technical Director. Performs mathematical and physical services for performing parametric analyses and solving en-

Visiting Swim Team Takes Meet Trophy

The crack Bakersfield Blue Fins outclassed the Indian Wells Valley Swim Team, winning the trophy at the Club pool last Saturday. Fifty-two events were featured in the combined boy, girl, and team participation and twenty-nine pool records were broken.

Class A (ages 15-16) produced the most winners for the IVW complement as three contestants took five individual first place awards. Those reaping honors were: Barbara Sutherland — 100 meter individual medley and the 50 meter breast stroke, Lynn Campbell — 50 meter back stroke and the 50 meter free style, and Mike Ayres — 50 meter breast stroke. The girls IVW "A" team also won the 200 meter free style relay.

Class B (13-14) had two winners: Kay Beresford — 25 meter butterfly, and Harriet Stone — 25 meter back stroke.

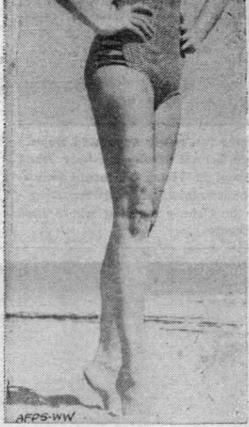

Class C (11-12) also boasted two first awards: Regina Hupka — 25 meter back stroke, and Betty Sutherland — 25 meter breast stroke.

Class D (9-10) managed one top individual honor: Paul Hupka — 25 meter back stroke.

Class E (8 and under) showed excellent teamwork as the IVW boys won the 100 meter free style relay.

PASTEL TOPPING

Folding a colorful jam or jelly into whipped cream is an easy way to make a sweet, pastel topping for an ordinary dessert.

SAND AND SEA—Just like fruits and sunshine, shapely Carol Euster is a home-grown Florida attraction. Carol is a good example of the many reasons for the Sunshine State's popularity.

File applications for above positions with administrative work of the office.

Mathematician, GS-12, PD No. 1P80057, Code P8043—Responsible for research and development of advanced digital computer programming techniques, including work on compilers, assemblers, monitors, sub-routines, etc. Qualified physicist and electronic engineers also will be considered.

Physicist, GS-11 or 12, PD No. 1P80056, Code P8028—Analysis of advanced and in-development projects. Work is both system and weapon oriented. Qualified mathematicians also will be considered.

Model Maker (Machining), Code P8094, \$3.08 to \$3.34 p/h—Machines, fits and assembles parts to construct experimental devices, models, and prototypes for development work, scientific testing and other purposes.

File applications for above positions with Nancy Reardon, Pasadena Personnel Division, Ext. 104.

Sports Slants

Lakewood Promises Top Softball Contest

By Chuck Mangold, Athletic Director

The Lakewood "Flying Hearts" softball team will play the Station Restaurant team tomorrow night at the Beer Hut softball diamond. Game time is 8 p.m. The Lakewood club is one of the top teams in the country. The Station Restaurant team is in first place in our Intra-Mural League with a ten and one loss record. The Flying Hearts beat our military team in Lakewood three weeks ago by a score of 4-2.

In last week's play the NOTS military team broke even at Tehachapi winning 8-4 and losing 8-9 in a double header play last Saturday.

The Ridgecrest Merchants downed the Bishop ball team by a score of 14-1 in a game played here last Saturday night. Bob Crawford and Chuck Fritchman homered for the Merchants, while Bob Kochman and Bert Anderson allowed only two scattered singles in a well pitched game for the local team.

Baseball
The Station baseball team got off to a good start in their season opener with a 11-6 win over the Bakersfield Merchants ball club. Bill Parlier pitched for the NOTS team allowing six hits while striking out eight. Dave Martin of the local team had three hits including a triple and drove in four runs.

The team travels to Tehachapi Saturday for a game with the prison nine. The next home attraction for the local baseball fans will be July 7-8 when Ken Meyers and Ed Roebuck bring their Los Angeles Dodger Rookie club to the Station for two games.

This will be an opportunity for new members and parents of League players to see how the League conducts its business and will provide them an opportunity to help make next year's season even more successful.

Archery Hunts
Deer hunters who are interested in trying their luck with bow and arrow this fall are reminded that hunting bows provided by the Special Services Division are available for loan at the Archery Hobby Shop located at 57-B Rowe. For the novice, Joe Stone will give basic instructions in use of equipment and shooting technique.

Archers are granted a pre-season 10-day hunting period prior to the regular gun season. Dates just announced for archery are July 22-31 (coastal) and Sept. 9-18 (inland). In addition, several of the local archers each year hunt in other States which have pre-seasons.

Are Seat Belts Your Life Line?
The National Safety Council discloses that not one person who lost his life in the holiday accidents analyzed in their recent survey was wearing a seat belt.

Seat belts won't prevent accidents, but they can prevent injury and death. Like insurance, they soften the blow if the worst happens.

It is interesting to note that, in the opinion of investigators, 42 per cent of those killed would have been saved by seat belts—and another 20 per cent might have been.

What's Doing In Recreation

Hawaiian Call Lures The Desert Dweller

By Jean Cone, Recreation Director

Tonight is dance time for all Station adults at the Community Center. Dancing begins at 9 p.m. while the intermission entertainment is slated for 10 p.m. The Hawaiian theme will be carried out with music by the "Beachcombers" and songs, dances, and humor of the Islands at show time.

Guests will be given leis to go with those Aloha shirts and Hawaiian dresses. Group table reservations will be held only until 9:30 p.m. Admission will be 75 cents a person.

Cribbage Winners

David and Martha Johanson emerged as the winning team in this month's Cribbage tournament. They were awarded individual trophies and their names have been engraved on the Champions plaque. David is employed with the Weapons Development Dept. Competing with the Johansons in a closely matched finals game were Judson Kennedy, AMI, and John Stoval, AB2, both from NAF.

Semi-finalists were Maury Coleman, and H. A. Becker, both with Public Works, and George Barker and Dave Abbott, Code 1838, both from NAF.

Forty-four players participated in the tournament. Next Month's Cribbage tournament will be held on July 10.

Pinochle Tourney

Next Wednesday night, June 21, at 7 p.m. a Pinochle tournament will be held in the Community Center lounge room. Single deck, partnership Pinochle will be played. All Station Pinochle players are invited—this means military, civilian, men and women. Trophies will be awarded the winning team.

Recreation Guide

The new "Summer Recreation Guide" which lists Special Services facilities, hours of operation, and phone numbers has been distributed. Any Department, Command, or individual who wants additional copies may pick them up at the Community Center receptionist counter.

Greek Theatre Tickets

Exchange certificates which entitle the holder to purchase at the Greek Theatre box office or by mail reserved seats at reduced rates are available at the Community Center. MEMBERS TO HONOR COMMUNITY PASTOR

A farewell picnic honoring the Rev. and Mrs. John L. Reid Jr. will be held at the Inyokern Park on Saturday, June 24, at 5:30 p.m. Rev. Reid, who has served the NOTS Community Church as pastor for eight years, is retiring in July to accept duties that will take him to another community.

The Fellowship Committee will prepare the ham and provide dinner rolls. To defray the cost, there will be a charge of fifty cents per adult and twenty-five cents per child under 12. To complete the menu, those attending are asked to bring the following in quantity to serve 10 to 12 persons:
A-H—Scalloped potatoes
I-P—Salad
Q-Z—Dessert.

Everyone is also asked to bring their own dishes, silverware, and beverage.
For further information, call Ext. 76141 or 72787 no later than June 19.

TRIPLE PROBLEMS
"How to get access to the printed page, how to travel, and how to get jobs;" these are the three major problems of most blind according to Dr. M. D. Graham, director of the Division of Research and Statistics at the American Foundation for the Blind. At least double the present research effort will be necessary to point to solutions, he says.

Oasis Club News
The Keynotes will provide dancing and listening music tomorrow night from 9 p.m. to 1 a.m.
The Magic Hour starts at 10 p.m. when the Singing Twins will enchant you with their unusual arrangements in song, backed by the moving, mellow tones of the Combo.

The Schlitz Sports film which was to have been shown June 7 has been rescheduled for Wednesday, June 21.

Education Aid Seen For AF Dependents

Information on scholarships available to dependents of Armed Forces personnel from the office of the Secretary to the Navy through SecNav Instruction 1765.5.

The Instruction states that although the Department of the Navy does not set aside funds for the purpose of awarding scholarships, the Secretary of the Navy has been requested to perform supervisory functions in connection with scholarship awards which have been generously established by donor organizations and individuals.

Scholarship selection committees have been appointed to choose the recipients on the basis of need, scholastic achievement, leadership, and character.

Basic requisites are that applicants must be dependent sons or daughters of military personnel, be a graduate of an accredited high school, and be eligible for admission to the college of their choice. Various scholarships are directed to assist the children of reserve, retired, or deceased personnel, and others specifically cite that recipients be dependents of officers or enlisted personnel in certain grade levels.

Funds will be paid directly to the schools to be attended by the successful candidate.

A partial listing of organizations offering scholarships are as follows: Navy Wives Club of America, Naval Academy Women's Club, Marianas Naval Officers Wives Club, Submarine Officers Wives Club, Bainbridge Officers Wives Club, Valley Forge Military Academy, and Culver Military Academy.

Test Department Cites 20-year Men
Two division heads in Test Department were presented 20-year Federal Service awards at department-wide award presentations on June 8 by department head, Dr. Ivar E. Highberg.

James DeSanto, Head of Missile Range Division, received his award on the basis of 15 years at NOTS preceded by five years as a Navy officer.

Robert Appleton, Head of Fuze Evaluation Division, has a similar background with 15 years at NOTS and five years as a Navy Officer.

DeSanto held the rank of Lieutenant Commander when he left military service and Appleton was a Commander. Both were stationed at NOTS when they were released from active service.

Station Commander Visits Pasadena

Captain Charles Blenman Jr. paid his first official visit to Pasadena on Tuesday, June 6th, in conjunction with a meeting of the Research Board.

On Wednesday, Capt. Blenman was briefed by technical personnel on current Pasadena developments and supporting research programs. He also visited the Hydrodynamic Simulator and Hydroballistics Model Laboratory.

Friday, June 9th, he toured the San Clemente Island Ranges, inspected the facilities, and reviewed technical programs.

CONGRATULATES—Station Commander Capt. Charles Blenman Jr. congratulates Wally Hicks, Associate Head of the Underwater Ordnance Dept., as he presents him a certificate and check for a Superior Accomplishment Award for his outstanding work in the field of supporting research. The presentation was made during Capt. Blenman's visit to Pasadena.

100 To Attend American Rocket Society Meeting

PASADENA — NOTS Pasadena will host 100 distinguished visitors today when members of the American Rocket Society meet here for their annual technical sessions on underwater propulsion.

The visitors are also delegates to the national meeting of the Institute of Aerospace Sciences and the American Rocket Society being held at the Ambassador Hotel in Los Angeles from June 13 through June 16.

Over 100 industrial and government organizations are represented by the delegates.

An extensive tour of Foothill facilities, the Morris Dam Torpedo Ranges and Propulsion Laboratories, is planned for the visitors this afternoon.

Topics to be discussed during the visitors field trip here will relate to torpedo propulsion technology.

During today's meet papers will be presented by the following: Saul Wolf and John F. Brady of the U.S. Naval Underwater Ordnance Station, Newport, R.I. Joseph Kaye and Arnold Field of the Joseph Kaye and Co., Inc., Cambridge, Mass.

William D. White of the U.S. Naval Ordnance Test Station, Pasadena.

W. T. Skinner and Edward G. Rapp of Thompson Ramo-Wooldridge, Inc., Cleveland, Ohio.

Dr. Robert C. Brumfield of MHD Research, Inc., Newport Beach, Calif. will serve as chairman of today's meet. Dr. Brumfield formerly served NOTS Pasadena as a consultant on underwater propulsion.

The DSN is a remotely controlled, unmanned drone which can be flown from the deck of a destroyer in any weather without risk to a pilot's life. With a payload of homing torpedoes, it can fly to the area where sonar gear has detected the presence of a submarine, hover there until instructed to drop its weapons, then fly back to the parent ship for rearming. Being unarmed, it could be expendable if for any tactical reason it should not be recalled.

The DSN-1 Drone Helicopter is a small, two-bladed coaxial helicopter with a rotor diameter of 20 feet, and is powered by a 72-horsepower Porsche reciprocating air-cooled engine. The production version of the drone helicopter will be powered by a more powerful Boeing turbine engine and will operate from both modernized and newly built destroyers.

AAUW BOOK REVIEW Study Group will meet next Monday, 1:30 p.m. at the McEwan home, 513-A Lexington. Mary Wickenden will review "The World of Mathematics" by J. Newman and promises a touristic view of math for the non-mathematician. Everyone invited.

FRENCH LANGUAGE CIRCLE members, old and new, plan an informal poolside barbecue dinner at the Club at 7 p.m. Monday, June 19. No formal program is scheduled other than entertainment by Joan Leipnik's Can-Can group. Reservations should be made in advance through Jean Haseltine, Ext. 724142, any day after 4 p.m. Dinners start at \$1.75.

DESERT ART LEAGUE and **CHINA LAKE PHOTOGRAPHIC SOCIETY** members will present a program of slides on Fiji and Tahiti next Wednesday, June 21, at 8 p.m. in the Community Center. Mr. and Mrs. Dean Couch will present the program. The public is invited.

Cdr. W. E. Betzer Feded At Farewell Luncheon
Cdr. William E. Betzer, Bureau of Weapons Technical Liaison Officer left NOTS Pasadena last Friday to assume duties in FWSE, BuWeps.

A farewell luncheon was given in his honor at the Talk of The Town Restaurant with sixty of his friends and co-workers in attendance. A huge cake with Navy motif, inscribed "Bon Voyage Cdr. Bill Betzer" was presented at the luncheon, and served as the luncheon dessert.

Cdr. Betzer came to NOTS Pasadena in August 1958 as BuOrd Technical Liaison Officer.
