#### Per Diem Pay Period Change Approved

The Navy Department announced this week a changeover from a weekly to a biweekly pay period for its per diem

The changeover will be effected the first biweekly pay period beginning January 7, 1962 and ending January 20, 1962.

This coincides with the beginning of the new leave year and the per annum pay period.

The manner of local implementation for the revised pay schedule will be announced at a later date by the Accounting Division.

#### graduate, was assisted by the Station in realizing an ambition which began in the eighth grade when his 9 ft. home-made rocket blasted off in a cloud of grayish yellow

smoke at G-2 Range Tuesday after- | achievement. "I will try again," Reynolds told nately 25 seconds, but Station per- this reporter Wednesday evening, sonnel reported it a favorable "In fact I've ordered new parts already. I don't think the missile was damaged too much. The first stage is at Bomb Disposal and I haven't seen it yet. The second stage hasn't been retrieved yet. I know it will take me from two to three weeks to rebuild the second

Accepts Job

If he was somewhat down hearted over the partial success of his rocket he was bouyed up by a job offer from Associated Science Lab oratories as a data specialist which he has accepted. He terms it a most pleasant outcome for it will enable him to supplement his college expenses while he attends Bakersfield College evening classes here. He plans eventually to enroll at San Jose State College in mechanical engineering.

The young science student had been assembling the 21/2 inch-indiameter, 9 foot long, rocket in his father's automotive workshop in Ridgecrest since last April. Revnolds used a solid propellant composed of a zinc-sulphur mixture in ne small bird.

#### Station Personnel Assist Young Reynolds was sponsored

Harold Metcalf, Technical Asst. to

ment coached him on the aerodynamics of rockets. Propulsion Development Department's Fay Mc-Cullough assisted the youth in the static firing of the motor prior to the field test while Art Breslow advised him on safety problems.

Test Department's Dick Harris, project engineer, Jim Deal, range safety engineer, and Bob Nesbitt, range egnineer, handled the field firing and obtained the camera and instrumentation coverage.

#### Parallels Kriesel's Firing

Reynolds' half-sucess Tuesday parallels the experience of Marshall Kriesel, 21 year old University of Minnesota student, who fired his Mark V rocket here for the first time last September. Kriesel, who is now a summer
