Michelson Lab Awards

Four win with years of effort

excellence at China Lake were honored with Michelson Laboratory Awards last Friday. This award, complementary to the Naval Weapons Center's L.T.E. Thompson Award, is one of the most prestigious forms of recognition at NWC.

Saluted for their long-term, outstanding contribution to the Center and the Navy were Dr. David K. Andes, A.K. (Sandy) Rogers, Werner G. Hueber and Clara K. Erickson. Capt. John Burt, NWC Commander and Gerry Schiefer, technical director, made the presentations at a lunch in the Commissioned Officers' Mess.

Capt. Burt said the awards recognized many years of service to NWC and the impact these individuals had on the Center, the Navy and the Department of Defense. Both the technical and administrative sides of the Center were honored with the award

David Andes was nominated by Dillard Bullard, head of the Intercept Weapons Department, for his"technical excellence and foresight in enhancing the Center's capabilities and technical reputation."

Throughout his NWC career, Andes has been involved in analysis and simulation of warfare systems to support missile development. He combined his talents as an outstanding mathematician with a keen interest and capability in computer science to develop and utilize advanced computer simulations of warfare systems.

When the related field of artificial intelligence emerged, Andes was called on to lead a Center-wide committee effort to develop a plan of action on AI. As the AI program progressed, it became apparent that conventional Von Neumann computers severely limited the use of AI in missile systems. The memory capacity and computational speed required to survive in the modern battle arena could not be realized without a revolution in computer processing. Andes led that revolution by turning his attention and talents to the new field of artificial neural networks. These

TOY DRIVE - Many youngsters in the Indian Wells Valley will enjoy a merrier Christmas this year thanks to the efforts of the annual Toy Drive spearheaded by members of the China Lake Marine Aviation Detachment. Sgt. Chris Beebe and Cpl. Clarence Lea show some of the toys collected. There are collection boxes at many locations on board NWC and in Ridgecrest businesses. Donations of new, unwrapped toys will be included in the holiday baskets for families of the valley who are in need this year. Photo by PHAA Cary

Celebrate the blessings

This holiday season is a time to cherish, a time to gather with family and friends, whether at home or in places far removed from China Lake, and celebrate the blessings of the year.

As China Lakers prepare for Christmas, Hanukkah and the New Year, we can be grateful for

another year in which this nation has remained at peace. We, the men and women, military and civilian members of the China Lake team play an important part in preserving the peace we all enjoy

When most of us sit down to a festive dinner this holiday season, or enjoy the celebration of the dawn of a new year, many China Lakers will be standing watch in a hangar, patrolling the network of roads, maintaining a vigil at important facilities or making sure there is food on the table for the sailors and Marines eating in the galley. No matter where we are, we remain part of a world-wide Navy team maintaining the peace we all enjoy.

As this year draws to a close we want to express the great pride we have in serving this nation with you. The patriotism, dedication and determination China Lakers display is a large part of what nakes this place special and makes it work so well.

1988 has been a year of accomplishment for China Lake and the Naval Weapons Center. It was teamwork which made all of the many good things possible. While individual diligence and excellence cannot be discounted, teamwork is the key to our success once again.

In a troubled world, we are fortunate to be able to choose how we each celebrate these holidays ndeed, we are fortunate to be able to celebrate at all. Much credit for this freedom must go to the military members whose preparation for war in order to preserve peace and freedom is a tribute to

Whether you are celebrating alone or with loved ones; whether you will be on duty during these special holidays or far from home; whether you will be enjoying your first desert holiday or the 40th t China Lake we want to extend to all of you and your families, the wish for a happy and safe

Pladson receives honors

Technical competence and outstanding management skill, combined with dedication and personal integrity throughout the years, helped bring the Navy Meritorious Civilian Service Award to Maggie Pladson last week.

Pladson, associate head of the Naval Weapons Center's Engineering Department, was honored at a retirement banquet with Capt. John Burt, NWC Commander, making the award presentation.

The Skipper noted this is the highest honor the NWC Commander can bestow on a civilian employee.

Sterling Haaland, head, Engineering Department, in nominating Pladson for the award wrote, "During his years as associate department head, he (Continued on Page 7)

FORTY YEARS-Melvin H. Keith, a physicist in the Target Vulnerability Office of the Attack Weapons Department received his 40-year Federal Service Award from Capt. John Burt, NWC Commander on Tuesday. Keith spent 37 of his 40 years at China Lake. As he said upon receiving the award, he came here for just a year or so in 1951. His honors over the years include becoming a Fellow of the American Ordnance Society and several sustained superior performance awards. Keith's wife, Vivian was among those attending the award ceremony.

AIM/RIM-7 missile program helped bring his nomination by Dillard Bullard of the Intercept Weapons Department.

The nomination letter reads, in part, "Due to current emphasis on competition in the defense acquisition process, the dual-sourced Sparrow AIM/RIM-7M missile program is of great interest as a model for other acquisition programs and consequently under constant scrutiny. Sandy Rogers maintained a team of technical and product assurance experts who assured delivery of the best possible assets to the fleet. Due to the complex nature of the missile. production problems have always been inherent in the program. . .His efforts resulted in increased missile assets with no loss of technical integrity. Direct results of Rogers' efforts were a very positive relationship with the sponsor and an enhancement of the Center's lead technical role on the program."

Since becoming associate department head in 1987, Rogers has been a leader of the department's technology base programs and has given leadership and focus to these departments in such a way as to maximize their contribution to the

department's on-going programs.

Bullard added, "because of his extensive knowledge of the acquisition system and his technical understanding, he has been frequently tasked to head up special efforts of Standard Missile, NATO Sea Sparrow and Sparrow" missile

In nominating Werner G. Heuber for the Michelson Laboratory Award, Edward Kutchma, head o the Aircraft Weapons Integration Department, said, "His initiatives have resulted in maximizing the productivity of Weapon Systems Support Activity (WSSA) operations and contribute strongly to a positive sponsor relationship Improving software development tools and methodology, planning the development to include realistic life-cycle estimates and demanding the highest quality for the price. from both in-house and contractor personnel, have resulted in highly successful WSSA products delivered on-time and within cost."

Heuber established, during his tenure as head of the A-6 Intruder WSSA, a disciplined approach to software development, validation and verification testing. His efforts transcended the WSSA and demonstrated an improved process for designing and managing software development programs throughout the Center.

The nomination also notes Heuber had a direct impact on the success of the A-6 Systems/Weapons created the disciplined software engineering environment that led to a highly successful program and further weapons systems integration software development.

Safety battles continue

downs? Being safe is not a goal that once attained, we can forget about. To be safe, whether at work or at home, you have to think safe. But most of us have to be reminded from time to time just what being safe is. If we didn't have to be reminded, no one would ever try to hang their safety award on the wall using an office chair with wheels as a step ladder, and of course, no one would ever drive too fast, or drive recklessly, or try and light their backyard barbeque with gasoline. But people do these sort of things all the time. None of use are immune to these temporary bouts with stupidity.

Why do we have safety stand- obvious hazards. Are all the circuit breakers properly labeled? Are there storage areas that have accumulated trash? How about tripping hazards? Are all the passage-ways clear? It's speakers on substance abuse in the as simple as that. Just make sure that hazards noted become hazards corrected. If you work in an explosive handling area, your time might be best spent looking over all of your operating procedures.

This year, Safety Standdown '89 is scheduled for Wednesday and Thursday, Jan. 4 and 5. If you're not sure how you can fulfill all four hours, let the Safety Program Office lend a hand. We have scheduled six separate one-hour presentations to A few years back, I grabbed the be shown at the Center Theatre and branch my chain saw was hung up the Michelson Lab Conference

Detective Gary Zvirblis, with the Kern County Sheriff's Department, is considered to be one of the top country. For those who missed his presentation last year during the standdown, here is another chance. Definitely a presentation worth attending.

Laser Safety - Dave Jenkins and Shari Donaldson (Code 315) will be coming back again this year to give their presentaiton in Michelson Lab Conference Room B/C This presentation has been very well received in the past, and is generally given to standing room only

on. The chain was still turning. . . If I had been asked what the correct procedure was. I would have answered. "Keep both hands on the saw until it has completely stopped before attempting to work it free." But my right hand had a mind of its own and it grabbed that branch. In the space of a heartbeat my fingers were mixed in with the chainsaw. I was never so glad as when I saw my fingers were still attached. Eighteen stiches. That was my lesson to remember. But would I have done it if I had thought about it first? Probably not. If you're reminded of what can go wrong, the chances of doing something stupid that could result in an injury are diminished. This is all part of the learning process. We're learning, even when we're only being reminded of something we already

Safety Standdown '89 is our way of reminding everyone to "think safe." During a two-day period, all DOD personnel are required to "standdown" from their normal work for a period of four hours. Those four hours are to be used to assess their safety posture, or in other words, everyone should look around them and ask, "is every reasonable step being taken to make this job as safe as possible?" One way of doing this is to perform a safety walk through your work spaces. To do this, simply walk around your work area looking for

Rooms 1000-D and B/C. Please bear in mind that seating is limited at both of the Michelson Lab conference attend the presentations at the Center Theater

Back Injury Prevention - Mr. J. "Scottie" Wallace is a retired safety engineer with the City of San Bernardino. Prior to retiring, Wallace and the back injury prevention program covering all city employees. As a result of his managing the back njury prevention program, the City of San Bernardino recognized a 79 percent reduction in employee back njuries during the first year. An achievement even more notable because he was able to maintain this level until his retirement four years

Stress Management — Dr. Jeff Besser has been a Center employee for the past four years. Dr. Besser has earned a Ph.D. in both psychology and law, and has taught at the university level in both Colorado and New Mexico. Dr. Besser's main area of research involves stress and its relationship with heart disease. Dr. Besser's Stress Management presentation has been given on Center to smaller groups with excellent

ty - Mr. Greg Eadie comes to the Naval Weapons Center with more than 25 years experience in the rooms, so if you don't want to miss a nuclear industry. Eadie has worked particular program, come early or for the Nuclear Regulatory Commission (NRC), the Environmental Protection Agency (EPA) and at the The presentations the Safety Nevada nuclear weapons test site. Program Office has scheduled are as Eadie will be addressing the basic safety precautions involved with ionizing radiation, depleted uranium ammunition and weapons x-ray.

AIDS - This year for Safety Standdown, we will be presenting was in charge of risk management two video tapes addressing the AIDS issue. The first will be a 23 minute video on "AIDS in the Workplace." An important video that helps to dispel some of the myths and misunderstandings concerning this serious health problem. In particular, how the disease cannot be passed from person-to-person during normal casual contact. This video will be presented at the Center Theatre during the morning and afternoon breaks between shows. The second video will be shown twice in the Michelson Laboratory Conference Room B/C and is 43 minutes in length. Narrated by Capt. William O. Harrison, Balboa Naval Hospital, this program looks at the disease itself, how it is spread, how it attacks the body, and what you can do to avoid being exposed. HM1 Wolfe of the Branch Medical Clinic

(Continued on Page 7)

Captain, recently I have been noticing the United janitors have been lifting trash in large burlap bags. The procedure is creating more work for the contractors. For instance, ashes fall out of the holes, liquids stain the carpets and floors require care more often. Vacuumming is a must every day. Also, the fabric irritates the janitors' hands to the point of severe irritation and redness. Why do the janitors at Michelson Lab and at the Headquarters Building still use plastic bags? The janitors at the North ranges, Thompson Lab, for instance, have to use burlap bags.

One of your concerns was that using the burlap bags creates more work for the contractor. Vacuuming, mopping and spotting of carpets are in most cases, done per visit to the building being cleaned. Coffee mess plastic bags are replaced per visit. When the burlap bags get soiled, the custodial workers have been instructed to return them to their supervisors to have them

As far as the fabric irritating the janitors' hands, rubber gloves and trash carts are provided for all areas of the base and it is at the custodial worker's discretion to utilize the equipment

Quality Assurance, Code 2671, have custodial inspectors which monitor the contractor performance. Deficiencies are reported and corrected, and surveillance will be increased to assure contract procedures are being adhered to. United is not in violation of the contract by using the burlap bags to remove trash from buildings. The government cannot direct the contrac tor, but only look at end results.

All China Lakers, including military personnel, civilian employees and their dependents, are invited to submit questions to this column. Such queries must be in good taste and pertain to matters of interest to a large segment of the China Lake community. Answers to these questions are directly from Capt. John Burt. Please call NWC ext. 2727 with your question and state whether you are a military member, civilian employee or dependent. No other identification is necessary. Since only three or four questions can be answered in the Rocketeer each week, anyone who would like to ensure getting an answer to a question may leave name and attress for a direct contact, but this is not required otherwise. There is no intent that this column be used to subver normal, established chain-of-command channels.

Riggs succeeds Pladson

Robert Riggs has been selected as Technical Data Division, is effective the associate head of the engineering on December 19. Riggs succeeds department. Sterling Haaland, Maggie Pladson who is retiring from department head, announced the the Naval Weapons Center at the end choice of Riggs, formerly head of the of this year.

VISITOR BRIEFING-Dr. Herbert Fallin, scientific and technical advisor to Commander-in-Chief Pacific Command, gets a briefing from Dr. Ed Kutchma, head of NWC's Aircraft Weapons Integration Department during his visit last week.

Workers can MIP anything

Crazy makers are those things we run into from time to time that just don't make any sense. They are the forms you have to fill out that no one ever looks at, the process you have to follow involving offices that don't have anything to do with the subject, or the documents that you have to resubmit even though nothing has changed. They make you crazy and they are MIPI stuff at its finest.

Lee O'Laughlin, our Center's fire chief, found a crazy maker a while back. It involved the mutual aid agreements that the Center has with other agencies and counties for fire fighting assistance. The agreements, he noted, are necessary and useful documents. But what didn't make any sense was headquarter's requirement to re-do the agreement whenever one or more of the people who signed the agreement changed! It meant that whenever a new county official took office or a new commander reported aboard the Center, for example, the agreements had to be renegotiated, even though the contents had not changed. A real crazy maker.

O'Laughlin tried to work the issue through headquarters, but in spite of repeated assurances of imminent action, nothing happened. So, he submitted MIPI No. 113-88 to do away with this requirement. Within one month after the MIPI had left the Center, his waiver request was approved Now the agreements are still reviewed every two years, but if the content is current, they remain in force even if all the original signers have left office.

If you have encountered a crazy maker that causes more work than seems to make sense, let us know. Call, write, "E" mail or drop by the MIPI office and let's see if we can't arrange a waiver to test out your idea on how to do things better.

camp at Naval Training Center in

Today that same recruit will be piped out of the Navy as a Master Chief at the hangar at Air Test and Evaluation Squadron Five. Navy Counselor Master Chief

Christopher M. Schultz has been enchanted with the Navy since Cub Scout field trips to Pensacola Naval Air Station from his home state, Alabama.

"I was set on a career in banking, but banking school would not have kept me out of the draft, so I chose to enlist in the Navy in 1965," said Schultz. And he says he's never regretted the decision.

After an initial 5 1/2 year sea tour, Schultz planned on leaving the Navy, but his CO and XO encoura last minute change in recruiting duty requirements, he received an interesting recruiting billet in Bar-

"I was pleased to receive this assignment as an E-5; I made (petty officer) 1st class during this tour and received a rate change to Career Counselor," he said. He also met his wife, Tess, in Barstow.

He attained his highest Navy exam score on the Navy Career Counselor test. "I was ready for this change," he explained. "My previ-

Twenty-three years ago, a ous rating (Sonar Technician) was a 19-year-old Navy recruit from Ala-critical one and required intense bama began his Navy career at boot training, inspections and safety checks. Because we worked with nuclear weapons, this was all a necessary evil, but was a high pres-

Schultz had also found that he quite naturally had become an informal counselor on his sea tour. "I enjoyed talking to the new sailors and related to them well," he said.

After a successful recruiting tour where he was encouraged to be involved with the Barstow community, he and his new family moved back to San Diego. He was assigned Destroyer Squadron 9. He enjoyed that tour and, as Command Counselor, dealt with varied administrative areas, from Public Affairs to command history.

In 1979, he transferred to the staff aged him to stay in and, partly due to of Commander Naval Surface Forces, Pacific responsible for Force Retention. He traveled over 210,000 miles in that job, visiting ships on the West Coast, often with Admiral Lee Baggett. "He had a great influence on me and supported my program, he said. Admiral Baggett will soon retire after a 40-year career.

He picked up Senior Chief during this tour and graduated from the U.S. Navy Senior Enlisted Academy in Newport, Rhode Island next. "This three-month program was fascinat-(Continued on Page 21)

SCHULTZ PREPARES TO RETIRE—Master Chief Schultz discusses his retirement ceremony with YNSA Jon Koster, left, and YNSA Keith Fields. He retires today in an All Hands traditional ceremony after 23 years of Navy service.

REENLIST—Another hitch in the Navy is made official by HM2 Jimmy Prescott as he takes the oath of enlistment from Lt. Charles Dries at the **NWC Branch Medical** Clinic. Many of his shipmates look on as do HMC Roddy Peterslie, Clinic LCPO and Capt. C.W. Cote. CO of the Long Beach Naval Hospital.

THE ALBUM Times & Tales of Inyo-Mono

The first three issues of 'The Album' featured a photo essay on the restoration of the famed Cerro Gordo mining town in southern Inyo County, a never-before published journal telling what it was like to come to the Owens Valley in the early 1900s, and the story of the two Bentons in Mono County.

Some of the stories in the fourth issue are "Here My People Lived;" a surprising weather anomaly; a little celebration of Inyo County Free Library's 75th anniversary; and a fascinating documentation of the last days of freighting by horse team, written for his family by John Schober.

Available in local stores, museums, visitor centers and Chalfant Press at \$2, \$3 by mail, \$12 (4 issues) subscription.

CNO says **Navy counts** on people, Congress

NORFOLK (NNS) - Strengthened by eight years of growth and modernization, the Navy will continue to meet its con maintain its readiness in the next administration, according to Chief of Naval Operations (CNO) Admiral Carlisle A.H. Trost.

"Over the long term," Adm. Trost said, "we are going to have to count on the fact that Congress and the American people recognize the value of our contribution, and that they are committed to preserving the key elements of our strength.

Speaking at the U.S. Atlantic Fleet change of command, the CNO said the Navy has escaped from the years of abandonment following Vietnam - a time when sailors suffered from low pay, back-to-back deployments, ent that wouldn't operate and a lack of spare parts - with renewed interest in the Navy from the American people and the present

"The Navy today. . . has greatly benefitted from a wise investment by the Congress and the American people in our national defense." Adm Trost said. "Our ships and aircraft are the most modern and capable in the world. . .and we have recruited and are retaining the right people, generally in the right numbers, to serve in

Adm. Trost said the Navy's current success will continue to be challenged by budget cuts, but that the Navy will "meet the challenges headon and overcome them."

S-3A crew ticketed

LONDON (NNS)-Two Naval aviators were fined \$21 for parking their aircraft illegally here last

The unusual incident occurred when an S-3A Viking from USS Theodore Roosevelt (CVN 71) overshot a runway at RAF Dbingdon, coming to rest on a nearby road. A British police sergeant came along and ticketed the aircraft for being "parked" on the road. Having made his humorous point, the sergeant tore up the ticket and let the crew off with a

Fortunately, the crew received no injuries other than a tickled funny bone. The VS-24 Viking was on its way to the British air base to be used as a static disply in an upcoming air show. The slightlydamaged aircraft was towed back to the air base after the incident.

Master Chief Schultz

ing and covered topics ranging from Navy programs to foreign policies," he explained.

His next assignment was to "One great ship-the USS Belleau Wood." While this assignment involved lots of sea duty (he only homeported for 65 days of the three year tour), he considers it his best tour of duty in the Navy. "Francis Raymond Donovan was our skipper, he's now a two star admiral (COMNAVMILPERS-COM), and he has been my inspiration ever since I met him-personally

"That ship had arrived at a point in time where it had such a positive spirit that it could not be broken," he said. "We were a respected ship and every person on board was proud to serve on her."

While the Schultz family knew that tour would mean deployments, it was a planned assignment. "I knew I wanted to make Master Chief; sometimes you have to make the hard decisions," he explained. "Shortly after I received this promotion, I was also made Command Master Chief."

While "shopping" tours with his detailer after the Belleau Wood tour, Master Chief Schultz had a good selection of tours, but was pleased to receive orders to Air Test and Evaluation Squadron Five. "I had never been associated with an aviation community," he said, "plus my wife's family is in Barstow.'

As Command Master Chief, Schultz is the primary liaison between the enlisted personnel and the Skipper. By advising the Commanding Officer on the morale, welfare, and health of the "troops", he deals with issues from 'A to Z'.

"It is often difficult to maintain military bearing at commands in outlying areas like China Lake," he said, "but I feel I have contributed in this area. VX-5 also had a problem with frequent occurrences of DUI's. icity, we've almost curbed this

1539 N. China Lake Blvd.

Schultz has also added immeasu ably to the positive attitude prevalent at the squadron by stressing recognition, awards and professional

The high regard for Master Chief Schultz is evident in the affectionate greetings heard around Hangar One. He tries to advise young sailors to make the most of their Navy career. "I encourage them to re-enlist; to take advantage of the benefits, experience, education, travel and world lessons one can obtain," he

Schultz said he learned some valuable lessons while on sea duty during the Vietnam war. One plaque in his office sums up those lessons: "The more you sweat in peace, the less you bleed in war--Chinese

"It's time." was Schultz's succinct reply to the question of why he was retiring. "I've served 23 years and I've accomplished everything I've set out to do, so it's time," he

Despite concern that his sentiment might be construed as "schmaltzy", Schultz added an additional reason for his Navy careerhis admiration for a former Naval officer-John F. Kennedy. "I really believe in his adage 'Ask not what your country can do for you, ask what you can do for your country.' hope I have served my country and feel grateful for the many fine leaders I've served with and the great experiences I've enjoyed."

To symbolize his service, he has been awarded two Navy Commen dation Medals, two Navy Achievement Medals. Combat Action Rib. bon, two Meritorious Unit Citations and four Good Conduct Medals. In addition, he has earned numerous campaign and service awards.

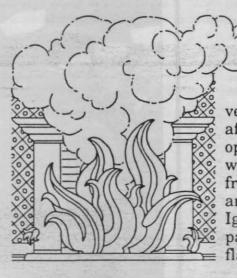

He and his family will remain in Ridgecrest. "I'm looking forward to spending more time with my child Through strong education and publ-ren, Brenda, 16, Christopher, 12, and Tasca, 9, " he said. He also enjoys golf and fishing.

fire-safe during the holidays:

day season.

Flocked Christmas Trees: Don't let the pretty flocked trees make you think that they are flame proof. The fact of the matter is, they are more dangerous than those that have not been flocked. A flocked tree absorbs water from the tree's needles, rapidly drying the tree and making it and the flocking very flammable. If a flocked tree does not bear the State Fire Marshal's Flame Retardant tag,

it can be dangerous. Make sure your Christmas tree is removed from your home as soon as possible after New Year's Day. This includes cut trees, pine branches and similar foliage.

Artificial trees should be clearly marked as made of slow burning

Fire Safe

Holiday time boosts need for caution

aterials. Trees with built-in lighting systems should have an Underwriters Laboratory (UL) tag on them. Use only indirect lighting on metal trees to avoid the possibility of

Decorations: Ensure that your decorations have a tag on them stating that they are approved by the State Fire Marshal as being flame resistant. Be extremely careful when putting up your Christmas decorations not to over decorate.

Lights: Christmas lights must be UL approved. Extension cords will normally have to be used, but should be kept to a minimum and suitable placing lights on the tree, check each string to ensure that they are in good shape. If you find a broken socket and/or broken or frayed wiring, discard the string of lights and purchase a new set. Always follow the Christmas tree light manufacturer's directions carefully when connecting strings of Christmas tree lights together. All holiday lights and extension cords should be unplugged before retiring at night and when the room is not occupied.

Open flames: The use of open flame devices such as oil lamps and candles is prohibited except in family housing, by permit for ceremonial purposes, and use in club dining

All holiday decorations should be removed as soon as possible after New Year's Day. Do not dispose of decorations or wrapping paper by burning them in the

Fire Division personnel wishes everyone a Merry Christmas and a Fire Safe New Year. Fire safety at this time of the year is very important and cannot be over stated. If you have any questions or need assistance regarding Christmas trees and holiday decorations, please call the Fire Prevention Branch at NWC ext. 2146.

in Radar and EW is the newest book al design examples. The text shows written by Richard Smith Hughes, a consultant for analog circuit designs at the Naval Weapons Center (NWC). The book is a practical starting point for people wanting to analyze and design basic building blocks of many radar, electronic warfare (EW), active and semiactive missiles and antiradiation missiles (ARMS), namely, Automatic Gain Control (AGC), signal thresholding and range tracking.

Hughes noted that although most modern radar, EW and related systems employ digital (software) technology to perform many of the functions once performed by analog circuitry, the digitizing of analog functions requires users to have a fundamental knowledge of analog circuit design and operation. "Analog Automatic Control Loops in Radar and EW provides this information," Hughes said.

The book is divided into three chapters. Chapter One presents AGC from a theoretical and practical standpoint, covering: static regulation, dynamic regulation, loop bandwidth, and rise time, with the

Analog Automatic Control Loops theoretical results verified by severthe methods of varying IF and RF gains, the results of square law and linear detection on the various AGC parameters, and the effect of self-AGC (the IF or RF signal having a controlling influence on the circuit's Chapter Two concentrates on the

necessity of providing a noise-riding threshold to compensate for the excess noise due to IF/RF amplication preceding a basic crystal video receiver. As a starting point to help define and design signal thresholding, a simple and straightforward noise tracking threshold is presented, illustrating the techniques involved and the results that may be

design of both Type I and Type II range tracking loops from a phaselocked loop perspective, Chapter Three gives examples verifying the design theory.

Hughes received his bachelor of science in electrical engineering from the University of Nevada (Reno) in 1960 and immediately started work at NWC as an analog circuit design engineer on various anti-radiation missile systems, active airborne radars and Soviet held the position of consultant for analog circuit design.

Analog Automatic Control Loops in Radar and EW is the fourth book Hughes has had published. He has written 24 feature articles and has been issued 21 patents. Some of his more noteworthy awards and honors are the L.T.E. Thompson Award (1988), American Defense Preparedness Association, Crozier Prize (1988), the H.G. Wilson Invention Award (1988), The University of Nevada-Reno-Professional Achievement Alumnus of the Year Award (1988), and the William B. McLean Award (1971).

"Since I worked on the book part of the time during work hours, and I used government pictures, tables and information gained for government use," Hughes explained, "I didn't receive any money for publishing the book. The government, however, benefitted rather well. The publishing company supplied them with unbound copies and the government put their own covers on them. Now the government has a supply of books to pass out to people who work in this area and they (the government) didn't have to pay for the publication."

According to Hughes, he published the book because "You cannot dedicate a government publication and I wanted to dedicate it to my radar simulators. Since 1980, he has wife, Janet, for putting up with all the hassles related to my work for the

12 December 1988

To Whom It May Concern:

We wish to express our deep appreciation to all who have donated annual leave to us. We have personally thanked those whose names are known to us. Some of the leave was given anonymously, and the names of some donors may have been lost when Jeanie's medical retirement was approved. We can only tell you that these wonderful gifts of leave from our caring friends have cheered and encouraged us both. We are very thankful to all our benefactors. Jeanie's health is slowly getting better as she is able to rest more. These gifts of leave have made it possible for George to continue working, and avoid having to take a medical retirement. These transfers of leave continue to make it much easier for him to survive

> Sincerely yours, George and Jeanie Stillwell

According to members of the experiences with other youth," he

will learn the rules of the games becoming an umpire, or who just Booth stressed that he would really (baseball and softball), he noted. On want to see how a person becomes an like to see some of the older youth, January 28, a mechanics class will be umpire, should attend the next IWUA (over the age of 15) get involved in held to help all new umpires, and meeting scheduled for 7 p.m. on umpiring this year. "Most of them even the old ones, to brush up on the Thursday, Jan. 5, at the old courthave played the game and know the mechanics of being an umpire. All house on Ridgecrest Blvd. (located

In addition, Booth added, the There will be some changes this umpires this year will be paid a nomiyear, noted John Rolof, president of nal fee. "If an umpire says he will be the association. "All umpires will at a game, and is to be paid for it, then umpires and officiated approximately need to attend the IWUA meetings, he is more likely to realize he has 200 games," said Rick Booth, the which will be held each Thursday in made a commitment and will be

Men and women interested in

Marksmanship class offered

Firearms and hunter safety will be taught at the Beginner's Rifle Marksmanship School scheduled to begin Jan. 22. The classes, conducted by the Sierra Desert Gun Club, meet from 1 to 4:30 p.m. each Sunday afternoon for 12 weeks. The course is open to all Indian Wells Valley residents 12 years of age or older.

The cost is \$30 per shooting student. Rifles, targets and ammunition are provided by the gun club. Adults, 18 years and over, may audit the classroom and non-shooting portions of the classes for a \$5 registration fee.

Space is limited. Registration will be taken Jan. 17 and 18 from 7 to 9 p.m. and on Jan. 21 from 9 a.m. to 1 p.m. in the lobby of the Ridgecrest Police Station.

Personnel News & Notes

Promotional opportunities

Applications for positions listed below are being accepted from Department of Navy employees currently working at NWC and from eligible employees of attached activities who are permanently assigned to NWC. This group includes employees with career or career conditional appointments; employees with permanent Veterans Readjustment Act (VRA) appointments; temporary employees with reinstatement eligibility; and handicapped employees with Sch. (A) continuing appointments. Also included are spouses, with competitive status, of civilian sponsors hired by a DOD activity within NWC's commuting appointments of the computing status of civilian sponsors hired by a DOD activity within NWC's commuting appointment of the computing status of civilian sponsors hired by a DOD activity within NWC's commuting appointment of the computing status of the co from other groups will be accepted when specified in an advertisement. Vacancies are subject to restrictions imposed by the DOD Priority Placement Program. Applicants must meet all legal and regulatory requirements, including minimum qualifications requirements, by the closing date of the advertisement. Evaluation of applicant's qualifications will involve using at least two assessment measures. Assessment measures are work experience, annual performance assessment rating and narrative, education, training, performance assessment and

awards.

Eligible spouses (of military sponsors) with competitive employment status may apply for employment preference. Those enrolled in this program will automatically receive consideration for employment on vacancies for which they applied. For initial employment information, career counseling and enrollment, call 939-3317 for an appointment.

HOW TO APPLY: Submit the following: a current application, SF-171 or other Human Resources Department pre-approved form; a copy of your most recent annual performance assessment narrative (note: a copy of your performance plan should be attached if the annual performance narrative description does not clearly state the tasks/duties performed); and a consoleted Background Survey Questionnairs. A supplemental narrative which relates your completed Background Survey Questionnaire. A supplemental narrative which relates your qualifications to each knowledge, skill or ability (KSA's) as cited in the advertisement is always desirable and may be required if stated in the vacancy announcement. Write the title, series, level (grade), and announcement number on all application materials. Not submitting the annual performance narrative may adversely affect your evaluation scores. Prior to submitting your application, complete Cover Sheet Form 12335/2, available at the releption desk. Make sure your address phone number ate are current covered and that all forms are Make sure your address, phone number, etc. are current, correct and that all forms are complete and accurate. If information is missing, your qualifications may not be fully and completely rated. Additional information cannot be submitted after the closing date of the announcement. A current date and a signature on the last page completes the application. Civilian Spousal Program Eligibles with competitive employment status must submit a copy of their sponsor's PCS orders with each application in order to be considered for Merit Promotion vacancies which do not state that status eligibles may apply.

Application materials are accepted, and blank forms are available, at the Reception Desk, Room 100, Human Resources Department, 505 Blandy. Announcements close at 4:30 p.m. on Friday, one week after the opening date of the announcement, unless otherwise specified. Applications received after 4:30 p.m. on the closing date will not be considered. Copies of applications may be submitted since applications are kept in an announcement file and cannot be returned or filed in personnel folders. The Naval Weapons Center is an Equal Opportunity Employer; selections are made without discrimination for any non-merit reason.

Engineer, DP-855-2/3, Multiple Vacancies, Code 64242 - This position is located in the Telemetry Systems Branch, Telemetry Division which is involved in the design and testing of telemetry systems for missiles and aircraft. Incumbent will have responsibility for design and development of airborne telemetry systems for branch program. Areas of support will include component testing, development of test procedures, specification and drawing support for competitive procurement packages, integration testing, captive and live firing test support. Job Relevent Criteria: Experience in analog and digital circuit design as well as some electronic system design experience; knowledge of design, development, test and analysis of electronic circuitry and ponents; ability to communicate both orally and in writing. To apply, send current SF-171 to Larry Harlan, Code 6424, NWC ext. 6017.

Secretarial opportunities

This column is used to announce secretary positions for which the duties and job relevant eria are generally similar. Secretaries serve as the principal clerical and administrative sup port in the designated organization by coordinating and carrying out such activities. Secreta ries perform numerous tasks which may be dissimilar. Positions at lower grades consist pri-marily of clerical and procedural duties and, as positions increase in grades, administrative ncitons become predominant. At the higher levels, secretaries apply a considerable know ledge of the organization, its objectives and lines of communication. Depending on grade evel, typical secretary duties are implied by the job relevant criteria indicated

Applicants will be rated against four or more of the following job relevant criteria: (1) abili-y to perform receptionist and telephone duties; (2) ability to review, track, screen and distrity to perform receptionist and telephone duries, (2) ability to review outgoing correspondence; (4) ability to compose correspondence and/or prepare non-technical reports; (5) knowledge of filing systems and files management; (6) ability to meet the administrative needs of the office; (7) ability to train clerical personnel and organize workload of clerical staff processes; (8) ability to plan and coordinates. nate travel arrangements; (9) ability to maintain and coordinate supervisor's calendar and t

Unless otherwise indicated, applicants for branch secretary will be rated on elements 1/2/3/5/8; division secretary applicants will be rated on elements 1/2/3/4/7/8/9; Program Office secretary applicants will be rated on elements 1/2/3/4/5/8/9; and department secretary applicants will be rated on elements 4/7/8/9. A SUPPLEMENTAL FORM IS REQUIRED AND MAY BE OBTAINED IN ROOM 100 OF THE PERSONNEL BUILDING.

No. 00-022, Secretary (Typing), DG-318-2, Code 003 mbent will provide secretarial support to the Public Affairs Office in the Office of the Commander. Ability to interact with all levels of contacts both on and off Center is necessary. Promotion potential is to DG-3, but not

No. 31-093, Secretary (Typing), DG-318-1/2, Code 3111 - Incumbent provides secretarial and administrative support to the AV-Wordprocessing/Spreadsheet experience

(Typing), DG-318-2, Code 3606 The incumbent provides secretarial support to the Harpoon/Slam Technical Office. Experience with the MacIntosh computer and CPT is desirable. Must able to obtain a secret clearance. Status eligibles may apply. Promotion potential to DG-3.

No. 38-003, Secretary (Typing), DG-318-1/2, Code 3892 - Incumbent will provide secretarial support to the Propulsion Research Branch (Code 3892) and to the Solid Propellant Research Branch (Code 3895). Experience with Macintosh desirable. Promotion potential DG-2. Previous applicants need not reapply. 39-042, Secretary

(Typing), DG-318-3, Code 39B10 - This position is that of the lead secretary for the Sidewinder Project Office, Intercept Weapons Department. As the lead secretary, the incumbent is (Continued on Page 32)

Tis the season to beware of perceptions Christmas is the season for giving circumstance under which the gift Except for one meal, the NWC

and receiving gifts. Gifts are given was made. and received for a number of reasons. Gifts symbolize feelings of friendship, love, and esteem. But, whatever the reason for the NWC employee receiving a gift Directive, that might result in or be NWC employees. A recently from a contractor employee with whom he/she has worked closely with during the year. Their working together through some extremely difficult times has created a strong bond of friendship. There Government efficiency or economy: are no motives behind the gift, (4) losing independence or other than the friendship between impartiality; (5) making a the two. Can the NWC employee Government decision outside accept the gift?

paragraph 6(m) states that the of gratuities does not apply to of this prohibition is that what is between Naval personnel (including perception. Again, people can Department of the Navy civilian employees) and their friends and relatives or the friends and relatives of their spouses, minor children, or members of their household where the circumstances make it clear that it is the relationship rather than the business of persons concerned that is the motivating factor for the gratuity and where it is clear that the gratuity is not paid for by any entity described in subparagraph 6g(1) (Government contractor or someone seeking to do business with the Government or someone whose interests may be substantially affected by the performance or nonperformance of the official duties of DOD personnel). But this is not the total

answer. Upon reading the paragraph above, it appears that the NWC employee can accept the gift because the motivation behind the gift is one of friendship. This is where danger lurks however. The paragraph states that the gift can be accepted "where the circumstances make it clear that it is the relationship" that is the motivating cause of the gift. The danger here is that the "circumstances" may be reasonably interpreted by another person such as a DOD Inspector General investigator or the NWC employee's supervisor as not clearly indicating that the relationship is the motivating cause of the gift. Other events that have happened in the past, events that may happen in the future, and even how others perceive the close friendship may cloud the clearness of the

-----CLIP and SAVE-----

Finally, there is the appearance of Directive 5500.7. This prohibition simply states that "DOD personnel expected to create the appearance of completed audit of the contractor's any of the following: (1) using public office for private gain; (2) giving preferential treatment to any person or entity; (3) impeding

official channels: or (6) affecting SECNAVINST 5370.2H, adversely the confidence of the public in the integrity of the prohibition against the acceptance Government." The critical aspect "customary exchanges of gratuities forbidden is the creation of a interpret circumstances differently. Again, the motivation behind a gift may be legitimate, but the appearance of an impropriety to others (who are neither the giver nor the recipient of the gift) can also be present. Does an NWC employee want to put himself/herself in a position where they have to explain in minute detail the motivations behind a gift given or received to investigators?

Another aspect of paragraph 6(m) of the SECNAVINST quoted above regarding customary exchanges of gratuities deserves attention. Specifically, acceptance of a gratuity is permissible where the relationship between people is the motivating factor of the gift, and where it is clear that the gratuity is not paid for by any Government contractor or someone seeking to do business with the Government or someone whose interests may be substantially affected by the DOD employee's performance. The danger lurking here is that an NWC employee cannot know for sure who is paying for the gift from his/her contractor friend. In this regard, the events of a recent investigation in which some NWO employees placed themselves in jeopardy should be discussed.

From 1985-1987, several NWC employees often visited a contractor's plant on official business. After business was concluded, the NWC personnel would have dinner with their contractor employee friends and on occasion did get tickets for concerts from their contractor friends.

Jan. 24-May 18, Tuesdays and Thursdays; 1230-1345; Training Center. By Professor Wooldridge, CSUC, via satellite.

Prerequisite: CSCI 151: Algorithms and Data Structures or equivalent, and Discrete Mathematical Structures or equivalent, or consent of instructor.

Scope: In-depth study of the design of efficient algorithms and associated data structures. Focuses on space/time performance analysis of algorithms. Topics include algorithm analysis techniques, searching and sorting, graph algorithms, numerical algorithms, combinatorial algorithms, NP competeness.

CSCI 397C-2: Computer Performance Analysis (3 units)

Jan. 24-May 18, Tuesdays and Thursdays; 1100-1215; Training Center. By Professor Vayda, CSUC, via satellite.

Prerequisite: CSCI 152: Operating Systems Programming, CSCI 172: Systems Architecture, and Statistics and Analytic Geometry and Calculus I, or equivalents, or con-

sent of instructor. Scope: A study of the methods for the measurement and modeling of computer systems, with the goal of identifying the parameters that determine system performance. Systems considered will range from simple uniprocessor batch systems to multiprogrammed multiprocessor distributed systems. The approach is pragmatic and is targeted at the practitioner. Case studies drawn from
