Vol. XLIV, No. 22/June 2, 1989

SAR group excels in mission; nominated for national award

HANGING IN THERE—Andrew Mitchell, a member of the China Lake Mountain Rescue Group, and Hummie Mann, an injured climber, are pulled up Mount Whitney to a place where a helicopter can land to pick up the victim.

By Peggy Shoaf

Dedication to saving lives and their unselfish commitment to the aims of their organization caused Capt. John Burt, NWC Commander, to nominate the China Lake Mountain Rescue Group (CLMRG) for the President's Volunteer Action Award. This nomination was endorsed by D.L. Kline, former NWC Public Affairs Officer; Sgt. Dan Lucas, Inyo County Sheriff's Office; and Lt. Carl Sparks, Kern County Sheriff's Office.

"The mere knowledge that they are available to assist this department (Inyo County Sheriff's Office) when needed for search and rescue (SAR) missions is very reassuring," stated Sgt. Lucas in his endorsement letter.

Lt. Sparks noted in his endorsement letter, "I would never hesitate to recommend the China Lake Mountain Rescue team to any county or state agency for any type of search and rescue mission involving lost persons or missing aircraft."

The President's Volunteer Action Awards were created in 1982 to honor those individuals and groups who make unique contributions to their communities through volunteer service and to focus public attention on these outstanding and innovative volunteer efforts.

The China Lake Mountain Rescue group has been in existence since 1958, and has responded to well over 500 SAR requests from California and other states, plus several from other countries. Most of CLMRG's activity is in the nearby Sierra Nevada. (Continued on Page 12)

A HEARTY HANDSHAKE—Congratulations are in order for Larry Pace of the A-6/AV-8B test and instrumentation branch (Code 3143). Gerry Schiefer (left) presented Pace with the Technical Director's Award while NWC Commander Capt. John Burt (right) looked on. Photo by TID.

TD recognizes Pace

By Julie Paulsen

Dr. Ed Kutchma, head of the Air-Craft Weapons Integration Department, recognized the values of hard work, innovation, knowledge and diplomacy when he nominated Larry N. Pace to receive the Technical Director's Award.

Pace serves as flight systems engineer for the Systems Weapons Integration Program (SWIP) for the A-6E aircraft. During the program's development and improvement, he was responsible for all flight engineering and instrumentation for the test and evaluation efforts.

The nomination letter signed by Dr. Kutchma stated, "Larry has consistently demonstrated a highly inno-

novative approach, combining a solid background of knowledge and technical expertise with the ability to analyze requirements, anticipate problem areas, and devise methods of preventing or alleviating them. He has contributed immeasurably to the program's success because of his dedication, outstanding knowledge, technical skills, innovative ideas, and the talented ability to work with diverse groups of personnel from all areas to pull the program together and continue to make it work regardless of problems or setbacks."

NWC Technical Director Gerry Schiefer surprised Pace with the award at a May 22 gathering in the (Continued on Page 12)

Two earn TD Award for AIM-9R contributions

Long hours and hard work paid off for Keith Clark and Greg Watson recently when they were presented the Technical Director's Award for Outstanding Technical Accomplishments by Gerry Schiefer, Naval Weapons Center Technical Director.

Clark and Watson were saluted for their key contributions to the successful development of the Sidewinder AIM-9R. The first successful interception of a target aircraft by the AIM-9R missile

took place at NWC early this month.

Schiefer, in presenting the award to a pair of surprised employees last Thursday said, "you've done well and we want to recognize you for this outstanding work."

The letter of commendation for Watson read, in part, "You have played a key role as the electronics design engineer responsible for the complex circuitry used in the AIM-9R hardware design. This included the development of the unique

layout procedure to eliminate corruption of the high-speed signals in the multi-layer printed wiring boards... Your technical expertise combined with your personal dedication have been a key factor in the development of the improved AIM-9R guidance and control section."

Watson, part of the RF Fuse Technology Branch in the Intercept Weapons Department (Code 39), said it was a honor to receive the award and noted it had been a real

team effort to develop the AIM-9R.

Clark's letter of commendation read, in part, "Your technical accomplishments included the development of the gimbal which uses one and one half gimbal rings to obtain the desired movement." Schiefer noted several attempts had been made by contractors to improve on Clark's unique design, but they always came back to his configuration.

Schiefer added that Clark's

"outstanding technical and leadership skills" had played a vital part in the successful AIM-9R team effort.

Clark, a member of the Air-to-Air Guidance Branch in the Intercept Weapons Department, told an approving crowd, which included his supervisors and co-workers, "It's been a major team effort and a lot of people have contributed to my receiving this award."

(see photo on page 12)

NWC's Wellness Corner

Exercise for health—just do it!

The American way of life has changed the American way of fitness. Today, only a few jobs require vigorous, physical activity. Many Americans ride in cars or buses rather than walk, use elevators instead of stairs, and sit at home during free time rather than being physically active.

In recent years, however, one of the most visible and encouraging trends in the country is the growing interest in physical fitness. Regular exercise programs are shaping up the hearts of America.

Brisk and sustained (aerobic) exercise contributes to good health in many ways. It improves the efficiency of the heart and increases the amount of oxygen that the body can produce in a given amount of time.

People with high blood pressure who perform aerobic exercise regularly under a doctor's supervision usually achieve a slower resting heart rate that is of long-term benefit to the cardiovascular system.

Exercise also helps people lose pounds of heart-straining body fat, which in turn may lower blood pressure. People who exercise regularly are more likely to cut down or stop smoking cigarettes; increase stamina and strength; burn more calories; develop greater resistance to stress and fatigue; and improve self-image, which can lead to adoption of other positive health behaviors.

To improve the efficiency of your heart and lungs and burn off extra calories, exercise must be brisk (raising heart and breathing rate), sustained at least 15 to 30 minutes (without interruption), and regular (repeated at least three times a week).

Walking is an easy way to begin an exercise program because it does not require special facilities or equipment other than good, comfortable shoes and a safe place to walk.

Plan to exercise at the same time each day. This will help you establish a routine. The best times are before breakfast or before dinner.

Most people have better luck sticking to a walking program if they get into the habit of walking every day, rather than every other day.

You'll get more benefit from extending the time, rather than the pace, of your walks.

To determine the distance of your various neighborhood walks, drive the routes in your car and check the odometer. Or, buy a pedometer at a sporting goods store.

Remember that animals who lead sedentary lifestyles need to increase their activity gradually, too. If you want your dog to accompany you, allow him or her to increase mileage week by week.

Check with your doctor before making significant changes in your level of physical activity. The key to a successful exercise program is to choose an activity you'll enjoy. By pursuing activities you like, you'll be much more likely to exercise regularly, keep on exercising, and enjoy its benefits.

HAVING FUN WHILE EXERCISING—Celeste Carvalho, Mary Netzer and Joanne Frederick enjoy the warm weather as they take their daily noontime walk.

Non-traditional support available for education

In addition to the conversion of military experience to college credits, many other educational opportunities are available through the Defense Activity for Non-Traditional Education Support.

Another means of receiving college credit for knowledge gained on the job or through independent study is the College Level Examination Program, or CLEP. It is one of the more popular DANTES test programs and is widely accepted by colleges and universities.

For someone getting ready to enter college or an officer accession program, DANTES sponsors some examinations required for admission at both the undergraduate and graduate levels.

Service members can earn high school equivalency credentials by passing the General Educational Development, or GED, test or the California High School Proficiency Examination.

Another major DANTES program is the Independent Study Support System. Through this program, service members can complete correspondence courses from accredited colleges and universities. More than 6,000 courses are available.

Contact your local education services officer for information about other DANTES programs and for help with planning a course of study or advice on how to best attain your educational objectives.

INNOVATION PAYS OFF—Dan Butler, Public Works Staff, received long-awaited recognition from Capt. Ken Kelley (right), Public Works Officer, this week. His innovative idea evolved from a MIPI submission to a Bene Sugg award in the capable hands of Barbara Fedoriga (center), NWC incentive awards administrator.

Short-timer awarded for invention

By Julie Paulsen

Some good ideas just won't die. That's the case of the 'Butler', a simple but practical invention conceived by a Center employee eight years ago.

Dan Butler was working as Michelson Laboratory coordinator

when he first recognized a need. Emergency workers, such as fire and police department personnel, struggled with automatically closing doors when work required them to enter secured areas on Center. The small metal device Butler invented could be carried in a pocket and

placed on a door to hold it partially open, freeing the hands for other use.

Butler took his idea and a job order number to the NWC machine shop (Code 364) where they crafted what looks like a flattened, bent padlock. First, fifty units were produced; later (Continued on Page 5)

Community Events

Cerro Coso's 15th Annual Student Art Show opens with a reception in the gallery foyer from 3 to 5 p.m. on June 1. Work was submitted by students in the Fall 88 and Spring 89 art classes for jurying by the Art Department faculty. The winning entries will be exhibited in the college's art gallery during regular class hours from June 1 through August 30.

This year's show is a total student effort. For the first time, Cerro Coso's gallery class, under the direction of Santiago Vaca, is responsible for the exhibit. The show includes the best work done in the drawing, painting, sculpture, ceramics, graphic arts, printmaking, photography and stained glass classes.

A post design competition was held and won by May Chan, who received the \$75 prize donated by Cerro Coso Associated Students.

Bring telescopes and binoculars or plan to share equipment at the Star Party being held by the China Lake Astronomical Society (CLAS) next Friday (June 2) at 8:30 p.m.

To reach the party site from Ridgecrest, go south on China Lake Blvd. 6.5 miles from its intersection with Ridgecrest Blvd. Continue straight across Highway 395 and Old Highway 395 (now known as Brown Road) is reached. Follow Old Highway 395 as it curves to the right and goes west. After 2.3 miles, turn left onto a dirt road. The CLAS Star Party is 0.5 miles along this road.

Signs and cones will be placed in strategic positions before 8 p.m. Call Carroll Evans at 375-5681 for more information.

On Sunday, June 11, a spaghetti dinner is scheduled from 2 to 5 p.m. at the Eagles Lodge, 301 W. Ridgecrest Blvd., to raise money for the IWV TV Booster Club. This group of dedicated volunteers brings television and radio signals from outside the valley to those people with outside TV antennas and with FM radios in cars. The dinner features all-you-can-eat homemade (by the Eagles) spaghetti, salad and dessert. Tickets can be purchased in advance or at the door for \$4 per adult and \$3 per senior citizen or child (aged 6 to 12) at Ace TV or from members of the TV Booster Board of Directors.

DESERVING OF A HEAD START—Members of the NWC Military Officers Wives Club (MOWC) awarded five students scholarships to assist them with their college educations. Pictured above, l to r, are Matt Ziegler (Cal State, Northridge), Jeff LaFranier (University of Arizona), Marissa Estrada (Cal State Long Beach), Raymond Banaban (Cerro Coso Community College), and Shiela Nixon (Fresno State University). Representing MOWC, behind the students, is Mary Burt. MOWC raised the scholarship fund by hosting a scholarship dinner/dance in March. TID Photo.

Enter before June 30—Contest for poet in everyone

June 30 is the deadline for entering the American Poetry Association's contest. The contest is open to the public and entry is free.

"People in the services often write powerful poems," said Robert Nelson, publisher for the association. "I urge service people to send us their

work. This may be the contest when someone in the services walks away with a prize."

The Grand Prize is \$1,000 and the Frist Prize is \$500. There are 152 prizes worth \$11,000 in all.

Poets may send up to six poems, no more than 20 lines each, name and

address on each page, to American Poetry Association, Dept. CT-44, 250 A Potrero St., P.O. Box 1803, Santa Cruz, CA 95061.

Each poem is also considered for publication in the *American Poetry Anthology*, a leading collection of contemporary verse. Accepted poets may be asked to buy a copy to insure inclusion.

There is no obligation to buy a book to win a prize. Winning poets will be published and receive a free anthology in addition to other prizes.

Each poet receives a free copy of the "Poet's Guide to Getting Published," a four-page booklet full of useful information.

During seven years of sponsorship, the American Poetry Association has run 30 contests and awarded over \$120,000 in prizes to 2,900 winning poets.

Phone users should check out who provides operator services

Anyone making official telephone calls from hotels/motels, airports or pay phones, needs to know that other companies, known as Alternate Operator Service (AOS) companies, may provide operator services from some of these locations. This type of service costs considerably more than conventional service. It's not highly publicized and users may not know they've used it until they get the bill.

AOS companies lease phone lines from national carriers (AT&T, MCI, etc.), then resell service to hotels/motels and other establishments that

route customer calls to the AOS company in return for a commission. Customers, picking up the phone in their hotel room, may not know about this arrangement due to the fact AOS operators are not required to identify themselves. Even using an AT&T calling card, a customer will still be routed to the AOS company, often at a cost many times higher than the AT&T rate. Customers may even be required to pay for uncompleted calls.

Customers may avoid being billed by an AOS by following these suggestions:

- When checking into a hotel/motel, ask if AT&T (NWC's regular long distance carrier is AT&T) is their long distance carrier. If not, ask how an AT&T operator can be reached.

- To be assured of reaching an AT&T operator, dial access code 10288+0+long distance number. This access code 10288 or 10ATT should automatically connect the caller to an AT&T operator.

Anyone having any other questions regarding AOS should call the Telephone Services Branch at NWC ext. 3451.

COMMENDED FOR HIS WORK—Mess Management Specialist Second Class Reynaldo Banaban recently received a letter of commendation signed by Vice Admiral John H. Fetterman, Jr., Commander, Naval Air Force U.S. Pacific Fleet. Banaban was cited for his exceptional managerial skills and highly professional manner. Photo by PH3 Rob Foster.

Don't feed the animals!

Water shortage draws coyotes

Housing says...Due to shortage of water, tenants living near open areas can expect to see coyotes near their houses. As food becomes scarce, coyotes will migrate to locations where they can find food and water.

The Housing staff urges Center residents not to feed these potentially

dangerous animals. Coyotes are creatures of habit and if fed will continue to return. They readily get used to people, however, they will never be tame enough to the point of being able to pet them.

The coyote is a known carrier of rabies and is capable of infecting

other mammals and humans.

Make sure there are no openings in your fence, keep garbage in a closed container and keep all cat and dog food out of reach.

If you have any problems with this animal, contact the Environmental Division at NWC ext. 3411.

LOOKING THEIR NAVY BEST—At a recent awards ceremony, recipients posed for this shot with Cdr. Philip Souza (left), enlisted personnel executive officer, and Capt. Robert Dropp (right), enlisted personnel commanding officer. Petty Officers standing (l-r) are: Mark Collins, Leo Dutton, Jeffrey Smith, and Jeffrey Dickerhoof, with ATAN Greg Rhodes, and FCCM John Capazzi. Photo by TID.

Capt. Dropp presents awards

At a May 25 ceremony on the Headquarters lawn, Capt. Robert Dropp, commanding officer of enlisted personnel, had occasion to make a number of presentations.

The Joint Service Achievement Medal went to petty officer second class Mark A. Collins for his meritorious service as a Telecommunications Specialist for the National Security Agency/Central Security Service, Europe from January 1986 to January 1989.

AQ1 Jeffrey Dickerhoof of the Quality Assurance/Analysis Branch was named Sailor of the Quarter for the first quarter of 1989.

For professional achievement in the superior performance of his duties while serving as Administrative Assistant, Divisional Career Counselor and Divisional

Training Petty Officer for the NWC Communications Center, Radioman First Class Jeffrey S. Smith received the Navy Achievement Medal.

A Navy Achievement Medal was likewise earned by Aviation Firecontrolman First Class Leo David Dutton. According to the award letter signed by NWC Commander Capt. John Burt, Dutton performed his duties as the Assistant Command Fitness Coordinator at NWC "with absolute dedication to the command's Physical Readiness Program and the health and well-being of command personnel."

ATAN Gregory T. Rhodes received a letter of commendation from Capt. Dropp for his support of NWC Military Administration while assigned to the Aircraft

Department, First Lieutenant's Office. The letter marked Rhodes as one of the Center's top-notch airmen.

Finally, a group of Auxiliary Security Force (ASF) personnel was recognized for its contribution to the Morale, Welfare and Recreation Division (MWR). When MWR head, Jim Bowen needed help moving weight room equipment in preparation for the gym renovation, the following personnel volunteered their time to assist: FCCM John Capazzi, MS2 Jonathan Rowcliffe, BU1 David Bowlsby, AZAN Kevin Carleton, AMH3 John Friel, and AMH2 Bob Bruce. Bowen sent a letter of appreciation to Capt. Dropp citing the group's outstanding job which allowed the opening of the temporary weight room on schedule.

Reservists welcomed

Navy Commissaries are extending a warm welcome to military reserve members and their dependents.

Reservists will receive the Armed Services Commissary Privilege Card in July to make access to the Commissary quicker and more convenient. Prior to the card's introduction, an interim procedure of identification is now in effect at all Navy Commissaries.

Authorized Reserve shoppers and dependents are asked to show a copy of their military orders upon entering

the store. The orders must state that the Reservist was ordered to active duty (or active duty for training) during the calendar year 1988 or 1989.

In addition, the member will be required to present a valid Reserve Identification Card (DD Form 2).

Dependents are asked to show a valid form of identification with a picture of the dependent and proof of their dependent status (for example, a dependent ID or Federal tax return) as well as a copy of the Reserve member's military orders. A Leave and Earnings Statement or W-2 form that clearly indicates that the Reservist performed active duty during 1988 or 1989 will also be accepted.

Identification procedures are necessary for all Commissary shoppers to ensure that only authorized customers gain access to the store. Navy Commissaries have been informed of the interim procedure for Reservists and their dependents, and no difficulties are expected during this period. Commissary personnel stand ready to serve the Reserve community.

The Skipper Sez...

QUESTION

Captain Burt, I agree one hundred percent with the Skipper Sez article complimenting the chaplains. I also feel that there is a group of hard-working, dedicated, responsible people who shouldn't go unnoticed, and that is our Center librarians. I have continuously used the Center library since 1983 and the warmth and hard work that go into my requests for particular volumes or works not available on Center is something that needs to be recognized. I have never once had a request for materials that the librarians couldn't attain. I, along with many others, would like to take this opportunity to thank the librarians for the wonderful job they are doing. They are terrific and we are very lucky, especially those of us who use the Center library. Thank you very much for listening, Sir.

RESPONSE

I wholeheartedly agree with you. Thank you for taking the time to say a kind word recognizing this fine group of hard-working people. They deserve to be commended.

All China Lakers, including military personnel, civilian employees and their dependents, are invited to submit questions to this column. Such queries must be in good taste and pertain to matters of interest to a large segment of the China Lake community. Answers to these questions are directly from Capt. John Burt. Please call NWC ext. 2727 with your question and state whether you are a military member, civilian employee or dependent. No other identification is necessary. Since only three or four questions can be answered in the Rocketeer each week, anyone who would like to ensure getting an answer to a question may leave name and address for a direct contact, but this is not required otherwise. There is no intent that this column be used to subvert normal, established chain-of-command channels.

Superb work earns honor

Petty Officer Theresa Hamilton didn't particularly have the desert in mind when she joined the Navy to see the world. But she's making the best of her tour at Air Test and Evaluation Squadron Five (VX-5). In fact, she earned the title Vampire of the Month for April.

"I grew up near Yellowstone in the town of Cody, Wyoming, home of the Buffalo Bill Museum," Hamilton quipped. "The winters were nine (Continued on Page 4)

Naval Weapons Center, China Lake, California Operating Principles

1. The Naval Weapons Center is a primary research, development, test, and evaluation center of the naval systems commands, responsible to the Director of Navy Laboratories (DNL) for the administration of assigned funds, the conduct of operations, and the accomplishment of the mission.
2. The mission of the Naval Weapons Center is to be the principal Navy research and development center for air warfare systems and missile weapon systems, and to serve as the National Parachute Test Range. This mission supports the naval systems commands by originating and analyzing new ideas in weapon systems; advancing them through research, design, development, experimental production, test, and evaluation; and assisting in introducing the resultant technology, weapons, and systems into production and service use.
3. The technical program of the Center is planned jointly by the Systems Commands and the Center, and is fully integrated and positively directed toward accomplishing the mission.
4. The Commander, a senior naval officer, is responsible to the DNL for all phases of the Center's operation.
5. The Technical Director, a recognized civilian scientist or engineer, is responsible to the Commander for all the technical work of the Center.
6. The Commander and the Technical Director are jointly responsible to the DNL for the effective and economical internal functioning of the Center.
7. The heads of all technical activities are responsible to the Technical Director through the appropriate line organization.
8. The primary function of all groups of the Center is to further the technical program. All departments participate according to their assigned responsibilities in accomplishing the mission of the Center.
9. It is the responsibility of the professional staff to produce superior technical accomplishments in research, design, development, experimental production, test, and evaluation of weapon systems.
10. It is the primary responsibility of the technical officers of the armed services assigned to the Center to assist and advise the civilian technical staff on matters relating to the development of material designed to meet service requirements and operating conditions.
11. To accomplish the mission, superior military and civilian personnel are essential, each with proper authority and responsibility, each complementing the other, and each supported by excellent facilities and adequate funds.
12. The Naval Weapons Center is an integral part of the naval establishment. Its personnel, military and civilian, are equally a part of that establishment. Every effort is made to provide opportunities for professional advancement and recognition to the end that all will be proud that they are a part of the United States Navy.

ROA convention planned

Houston, Texas, will be the location of the 63rd annual national convention of the Reserve Officers Association of the United States on June 21-24.

Upwards of 2,000 members and guests are expected to attend the three-day meeting that will headquarters at the Westin Galleria and Westin Oak hotels in Houston. Information and registration data can be obtained from ROA at 1 Constitution Ave. N.E., Washington, D.C. 20002.

TAKE NOTE—AZ3 Theresa Hamilton (left) was Vampire of the Month for April. She works with supervisor AZ2 Ann Tricarico at VX-5 Maintenance Control. Photo by Julie Paulsen.

Hamilton honored...

(Continued from Page 3) months long, but the summers were beautiful."

"Leaving home for the first time after joining the Navy was a real eye-opener. Boot camp makes you grow up. No more glass bubble—they pop that right away," she added.

As an aviation maintenance administrationman, Hamilton maintains aircraft logs and records in the VX-5 Maintenance Control work center. Her letter of commendation signed by VX-5 commanding officer, Capt. Eric Vanderpool, stated, "Through personal diligence and superior planning she insured the completeness and timely submission of flight data, aeronautical service records, aircraft logbooks and monthly inputs...her personal involvement in training junior personnel in all aspects of the AZ rating is commendatory."

The Vampire of the Month award recognizes exceptionally hard working and dedicated sailors assigned to VX-5.

"The Excitement of Life"

On my first trip to Disneyland (do not be surprised because I am a product of the Midwest and Eastern U.S.), I was filled with as much excitement as the three of my four children who went with me. During the following week, while in San Diego attending the annual Professional Development Training Course for Navy chaplains, excitement engulfed me about spiritual disciplines such as meditation. Since I tend to be action oriented, I am excited that meditation can strengthen me in my various activities.

Looking back on the Disneyland trip as well as the event in San Diego, it is unfortunate that many people are not excited about life or their world. Disneyland is a testament of the genius and creativity of Walt Disney, who undoubtedly was excited about his work. The San Diego event reminded me that the purpose of life

is living.

I am well aware that life cannot always be joyful. There are times of sorrow. Yet life lived to the fullest will offer joys and sorrows. We are meant to be involved in relationships with one another. There are joys involved in relationships. And there are sorrows which come when those relationships end by death. We are meant to grow in our joys and sorrows.

There is an exciting prospect. Life is too short not to be lived to the fullest. Life is too short for us to complain. Life is too short to despair of it. Life is exciting. Enjoy it. Rejoice in it. Be excited about it. To paraphrase in spirit my fellow chaplain, Gerry Goodman, from his sermon on May 21: "Sing to the world about the excitement of life, and do not let anyone take away your song."

LITTLE ANGELS—Fourteen members of the All Faith Chapel's First Communion Class recently received their first communion from Father Toni Casimano. The communicants were (first row, l. to r.) Elena (Michelle) Coulter, Kari C. Zagala, Michael B. Baun, Mathew E. Pond, Samantha E. Hiser, Daniel G. Duluenta, (second row, l. to r.) Gloria A. Techaira, Anthony F. Allen, Lucy M. Finger, Eric M. Cabal, Peggy L. Fahrenhorst, Michelle F. Farne, (third row, l. to r.) Brian M. Cabal and Allan M. Cabal. Bobi McDonald (back row, far right) and her assistant, Luisa Cinense (back row, far left), volunteered their time and taught the class. TID photo.

Because the Officers' Pool will be closed this weekend due to the Bjorklund Swim Meet, the Enlisted Pool will be open to all authorized NWC pool users.

Theories really work!

Members learn more about quality circles

Members of the Technical Data Division have decided to quit circling the subject and address quality head on by investing training time in how to make 'Quality Circles' really work.

Twenty-three China Lakers spent four days in May proving to themselves that effective teamwork can improve their productivity and work quality.

"We had been watching Code 364 solve problems using the Quality Circle approach," said Peggy Ames, administrative officer. "They referred us to Nancy Todd of Productivity Resources, Inc. from Charlotte, North Carolina."

Todd's workshop allowed the participants to really understand Quality Circles.

"She was outstanding," said Louise Knecht. "She had a knack for pulling people together and allowed us to prove her theories for ourselves using case studies."

Some participants were skeptical of the training at first, but their doubts were overcome. "Her theories really work," said Shirley Blank. "The change in the group from the first day to the fourth day was amazing."

The students were divided into three work function groups and set out to develop an understanding of employee involvement programs; to learn and practice problem-solving techniques; and to fine-tune interactive skills.

According to Ames, the class built up a high energy level among the participants. "Now, we need to take this new knowledge and excitement level and build on it in our quality circles."

The division's steering committee is developing a set of 'global goals' covering high priority issues. The quality circles will begin meeting next week to discuss these goals, name the circles and discuss the logistics of the meetings.

Each circle has a leader and a facilitator. The leader is concerned with circle content, while the facilitator is concerned with process.

"The facilitator's goal is to help develop a self-managing group," explained Knecht, a facilitator. "The groups will meet once a week and the facilitators will attend each meeting in the beginning and, after a few months, only attend infrequently."

The participants believe that the training they received is definitely going to help them achieve their goal of functioning quality circles. "We learned that teambuilding really starts with building individual self-esteem," said Phil Wilson. "Our own personal positive attitudes are contagious and can contribute to the well-being of the group."

Quality circles are themselves becoming contagious and spreading at the Naval Weapons Center. Members of the Technical Data Division believe that with the skills they have learned and with continued enthusiasm, their quality circles can improve productivity, quality and morale within their division.

For more information on the training or on quality circles, call Peggy Ames, NWC ext. 1054.

A CIRCLE OF QUALITY—Members of the Technical Data Division recently completed a four-day workshop on quality circles. Pictured are, back row, l to r, Pam Hammond, Chris Rudolph, Connie Ferguson, Shirley Blank, Debby Hill, Sharon Morgulec, Marge Stanton, Kathryn Shepherd, Glenda Keene, Ellen Mahoney, Michelle Smith, Instructor Nancy Todd. Seated in the second row are, l to r, Liz Cornelius, Toni Caraker, Peggy Ames, Linda Maxwell, Paulette Meadows, Louise Knecht, and Tina Rockdale. Front row participants are Phil Wilson, Shawn Schreckengost, Mike Francis, David Leighton, and Chuck Schuyler. TID Photo.

Parking is restricted

On-base residents are reminded to be aware of the days and times of street sweeping. Signs are posted throughout the residential area with the street-sweeping information. The China Lake Police Division will cite drivers of vehicles in violation of this rule (NWC Instruction 5510.29 parking regulations).

Time limit is adopted for U.S. checks

At the present time, U.S. Treasury checks can be held indefinitely before being cashed. Because so many checks have remained outstanding for long periods of time, the Government will be implementing a new policy on Oct. 1.

The new policy requires that U.S. Treasury checks be negotiated within one year of the date on the check. Checks issued before Oct. 1, 1989 will become non-negotiable on Oct. 1, 1990.

For any questions concerning U.S. Treasury checks and/or this policy, please call the Disbursing Office (Code 2855) at NWC ext. 2116.

MORE PEOPLE REAP BENEFITS FROM H&R BLOCK TAX COURSE

Thousands of successful tax preparers started their careers with the H&R Block Income Tax Course. H&R Block has been teaching income tax preparation for over 30 years and this year is offering a basic income tax course which will begin June 21st with classes from 9 a.m. to 12 noon. A second class will begin August 29th with classes from 6 p.m. to 9 p.m. Many of the most successful people in the tax preparation business started with this basic course which teaches various phases of income tax preparation. The 75 hour course progresses from simple to complex tax problems. Students learn through classroom discussion and homework.

The course is ideal for those interested in tax preparation as a career or for those who want to learn about taxes for their own personal use. The course is challenging and, for those who are highly motivated, can prove to be profitable as well. No prerequisites are required for enrollment.

Qualified course graduates may be offered job interviews for positions with Block. Many of Block's employees find the flexible hours a plus. However, Block is under no obligation to offer employment, nor are graduates under any obligation to accept employment with H&R Block.

One low course fee includes all textbooks, supplies and tax forms necessary for completion of the course. Certificates and 7.5 continuing education units will be awarded upon successful completion of the course.

Registration forms and a brochure for the income tax course may be obtained by contacting the H&R Block office at 801 N. Downs, #G, 375-8306.

TD Award...

(Continued from Page 1)
WSSA conference room. Commenting that Pace has been around the Center for almost 30 years, Schiefer acknowledged his many contributions, including his notable work on the SWIP program.
Reading from the award letter the TD related, "Your achievements and significant contributions as a Test Engineer are a credit to you and are reflected in the enhanced capability of the A-6E SWIP aircraft delivered to the Fleet with its standoff weapons systems and an improved attack posture. It gives me great pleasure to express my appreciation and congratulations for a job well done and to present you with the Technical Director's Award."

Pace countered by expressing his appreciation to troops he works with. He stressed, "It's working with guys like you, not necessarily what I accomplish, that really counts."

TD AWARDS—Greg Watson (left) and Keith Clark are presented the Technical Director's Award by Gerry Schiefer, NWC Technical Director. Watson and Clark were recognized for their key contributions in development of the Sidewinder AIM-9R missile. Photo by PHAN Cary Brady

da range, especially in the vicinity of Mt. Whitney, the highest point in the contiguous United States.

CLMRG has an extremely active training schedule, including many mountain ascents yearly to maintain members' physical conditioning, route familiarization, altitude acclimatization, and technical climbing skills. In addition, each member is expected to participate in up to 20 days of training every year in climbing, first aid, search methodology, rescue techniques, helicopter operations and tracking.

To date, CLMRG has successfully retrieved over 400 people who

had been stranded, injured or missing. The group averages about 30 SAR operations annually, expending approximately 5000 man-hours in the process.

While the group did not win the award, they did receive a letter from President Bush congratulating them on being nominated. The letter reads, in part, "Congratulations on being nominated for the 1989 President's Volunteer Action award. Your nomination reflects the profound influence you have had upon your community, as well as the inspiration and joy you have given to others... You have won the respect and gratitude of your friends, neighbors and the Nation. Barbara joins me in saluting you and sending you our warm best wishes."

Leaders of the group are Arold Green, Daryl Hinman, Robert Rockwell, Thomas Stogsdill, Bart Hine,

Robert Huey, Linda Finco, Lee Lucas, Michael Renta, Robert Adams, Michael Mason and Ronald Atkins.

Thomas Sakai, Carol Burge, Sheila Rockwell, Mary Schmierer, Andrew Mitchell, Larry Gleason, Thomas Roseman, Dennis Burge, Scott McDowell, Daniel Harris, William Martin, Paul DeRuiter, Michael Wisecarver, Chris Ostermann, Doug Speck, Ellen Schafhauser and Loren Castro are also members of the group.

Additional members are Randy Walker, Ronald Leiser, David Silverman, Lawrence Seibold, Gary Cunningham, Frank Buffum, Steven Walker, Phillip Wilson, Christopher Antonsen, Allen Jones, Phelps TerHeun, Betty Meng, Carol VanVerst, Roger Meng, Bob Fletcher, Lloyd Brubaker, Robert Westbrook and Kenneth Amster.

Fight against paperwork continues— New MIPI simplifies procurement

Al Cleland found a portion of NAVWPNCENINST 4101.1C to be more of a hindrance than an aid when its instructions were followed in the procurement of energy consuming devices.

The instruction, which covers procurement procedures for lighting equipment, portable heating devices, refrigerated air conditioners, water heating equipment, ranges and microwave ovens, was not a problem; just Part 4 of the instruction.

This portion called for the completion of an Energy Conservation Exemption Justification Form (NAVWPNCEN 4101/3) and its submittal to the Energy Program Man-

agement Office, which had to be done prior to the procurement of the needed item. Once approved, a copy of the form was then sent from the Energy Office to the Supply Department to start the acquisition process.

Cleland viewed the effort expended in completion of the form, its distribution and the time spent acquiring required approval signatures as wasted effort. So, via the MIPI process, he proposed the elimination of NAVWPNCEN Form 4103/3. He recommended that the Special Review Certification on the 9-Part Stub serve as the singular energy exemption certification.

After the MIPI had been staffed

through the appropriate codes and the Model Installation Program Advisory Committee for recommended approval, the initiative found its way to the desk of NWC's commander.

Capt. Burt agreed with Cleland's proposal; NAVWPNCENINST 4101.1C was ordered revised; thus eliminating the requirement to complete a separate Energy Conservation Exemption Justification Form (NAVWPNCEN Form 4101/3) whenever the 9-part stub could serve as justification for exemption.

Thanks for MIP'n with us, Al. We'll be looking forward to receiving more good ideas from you.

By the MIPI Program Office

Invention aids emergency teams

(Continued from Page 2)

an order for 100 was placed. "I asked the Navy if they wanted to patent it," related Butler. "They weren't interested."

Years later when the NWC MIPI program began, Butler submitted the idea to their office. They looked it over and passed it to Barbara Fedoriga, NWC incentive awards administrator, as a Bene Sugg submission. The Bene Sugg Award is a monetary means of rewarding employees for suggestions that benefit the Navy.

Butler received his award this week from Capt. Kenneth Kelley, Public Works Officer. He was glad to see his idea recognized officially before he retires today.

According to NWC Deputy Fire Chief Darrell Johnson, the device has been used by his department for several years. "Each firefighter has been issued one or two. They are extremely useful when going through a building, checking rooms for people. As each room is checked, a 'Butler' is put on the door," Johnson noted. "When bringing a fire hose through a building, a 'Butler' prevents doors from closing on the hose, shutting off water pressure." Later the devices are retrieved from the undamaged doors for reuse.

Butler, whose father was a federal fire fighter and NWC retiree, has a personal desire to uphold the profession. "Firemen have enough to worry about without having to hold doors open," Butler said. "If this helps them look and do better on the job, that's important to me."

"If the 'Butler' becomes a valuable asset," he added, "I'd like to give China Lake Fire Department the rights to it, with any profits going to its scholarship fund."

An NWC employee since 1966, Butler has resided in Ridgecrest since 1945. He was among Burroughs High School's first graduating class in '46 when he joined the Navy. Duty station number one was China Lake

where he worked in the Aerology Office and witnessed Capt. Sykes

commission the Naval Air Facility. After fulfilling his military obligation he returned to the University of Southern California and obtained a History degree. He came back to China Lake to teach elementary school from '59-66.

His NWC career ends in retirement today. Butler and his wife, Barbara, a recently retired school secretary, plan to remain in Ridgecrest to be near their daughters — Dianne Campbell, who works at CSC, and Bev Ewbank, who teaches at Richmond School — and their grandchild.

INCREDIBLE SHRINKING MAN—Greg Carpenter of the engineering department's materials processing and evaluation branch was tasked to complete an unusual job for Cerro Coso Community College. This bottle opener was designed and crafted by an art student for display in the college sculpture garden. NWC agreed to plate the sculpture with a cadmium coating as a public service. LOOKING FORWARD—These three graduating seniors are looking forward to graduation from high school and to the Second Annual Graduation Party at the Officers Club Thursday night. The seniors and parents are grateful to the many businesses and organizations which have donated to the event, especially the NWC Officers Wives Club. Joining Kathy Huey, far right, a parent and member of the organizing committee are Rob Huey, Jason Hall and Jean Chan.

Party offers choice

Begun as a positive choice of celebration for graduating seniors, the second annual Senior Grad Night is set for Thursday, June 8 at the Officers' Club.

The all-night party (10:30 p.m. to 5 a.m.) will include swimming, dancing, a DJ, games, food, door prizes

and entertainment. Many local businesses, groups and individuals have donated cash and door prizes to this event. Jan Leverett, chairperson of the Committee for a Safe Graduation, is still accepting donations, door prizes and volunteer names. She can be reached at 446-6739.

Enhance Macintosh productivity!

Mac users invited to first gathering

The first official meeting of a new user group for the Apple Macintosh personal computer will be held on Monday, June 5, at 1430 in Michelson Laboratory Conference Room A (the Management Center). All Mac users are invited to attend. Anyone who would like virus protection freeware, as well as User Group information on disk, should bring a formatted 800k 3 1/2-inch floppy disk to the meeting.

The purpose of the Naval Weapons Center Macintosh User Group (NWC MUG) is to enhance the productivity of NWC employees, contractors, and consultants using the Macintosh in an official capacity. Planners of the MUG expect work-related productivity gains to result from the group's activities.

"As a Mac user, I'm excited about the prospect of developing a network of people I can call to find out how to make the Mac jump through some very specific hoops," said Dan Burnett, an employee of the Employee Management

Relations Division. Burnett, interim president of the NWC MUG, lists other benefits of the MUG as monthly meetings and networking sessions, new product demonstrations and reviews, a readily accessible library of shareware and freeware, a bulletin on topics of interest to NWC Mac users, and special interest groups focusing on specific types of Macintosh tools.

Planning for the new group began when Chuck Jones, an employee of the Advanced Computing Technology Office, returned from MacWorld Expo with a copy of "Just Add Water," an Apple Computer brochure on how to start, sustain, and enjoy an Apple user group. While he was at the expo, Jones had an opportunity to discuss user groups with representatives from several other Federal installations. User groups are gaining widespread acceptance as a good way to increase productivity on the Mac, Jones learned.

Jones, Burnett, and a nucleus of other Mac users have produced a

draft constitution and bylaws and have appointed interim officers to get the NWC MUG on its feet. The group has defined the purpose of the NWC MUG as enhancing the productivity of NWC employees, contractors, and consultants using the Macintosh in an official capacity.

In addition to President Burnett and Jones, who is functioning as ambassador (coordinator of Apple-related activities), the following people are on the interim NWC MUG board: Mary-Deirdre Coraggio, secretary; Marcia Daly, software librarian; Renee Simpson, newsletter editor; Liz Babcock, publicist; and Naomi Norris, member-at-large. Also involved are Sharon Hicks, Chip Keyes, Jon Paris, and Bruce Lowry, who will be coordinating special interest groups (SIGs).

The June 5 meeting is designed as much for information-gathering as for sharing of plans. MUG planners would like to focus on the interests and concerns of the user community. To allow maximum sharing among users with specific concerns, SIGs on the following topics are planned: (1) Beginning Mac Users, (2) Office Automation, (3) Engineering/Programming, (4) HyperCard, (5) Communications, (6) Graphics, and (7) Business (Spreadsheets, Project Management, Data Bases). Other SIGs may also be set up, depending on the interests of NWC Mac users.

The group encourages any interested Mac user who is unable to attend this first meeting to send someone else to represent them. "We want to know what your Mac interests are," Burnett stressed. "We're in this computer age together—let's pool our knowledge for more productivity and fun."

Aqueduct's controversies to be subject of talk

Greg James, Inyo County Counsel and Water Dept., director, will be the speaker at the Historical Society's annual banquet on Monday, June 12, 6 p.m. at the Eagles Lodge on West Ridgecrest Blvd.

James' illustrated talk will be on the historical background and current status of the Inyo County-City of Los Angeles aqueduct controversies

which stem back to the beginning of this century.

Negotiations between Inyo County and Los Angeles in recent years relative to groundwater pumping in the Owens Valley and the associated environmental issues foretell developments which are of critical importance, not only to Inyo County, but also to the whole of the Upper Mojave

Desert. James has been a key leader representing Inyo County in these negotiations.

James attended the University of California, Santa Barbara, where he received his undergraduate degree in history. He continued with graduate studies at UCLA and received his law degree from that institution.

His professional experience

includes service as Deputy District Attorney in Inyo County, private law

practice in Bishop, Assistant County Counsel for Inyo and, since 1982, county counsel and water dept. director. He is a native of Los Angeles, but has been a resident of Bishop since 1977.

James is married, with two sons,

and is an outdoor and fitness enthusiast.

The public is invited. Tickets for the banquet are \$9 per person and can be purchased at the Maturango Museum and at Hibberts Copies, 313 N. Norma; or by calling Billie Hise at 375-1967, John Di Poi at 375-2610 or Bruce Wertemberger at 375-2369.

If eligible, some sailors may extend current tour

WASHINGTON (NNS)—Sailors with a planned rotation date in FY-1990 who want to extend their current tour for one year have that opportunity.

If you are serving in type 2 through 8 duty and have a PRD between

October 1, 1989 and September 30, 1990, and have not received follow-on orders, you are eligible to apply for an extension. Certain ratings, listed in NAVOP 065/89, on type 1 duty may also apply.

Interested officers should submit

request, citing NAVOP 065/89 as a reference, with command endorsement to commander, Naval Military Personnel Command (CNMPC) by April 30, 1990.

Interested petty officers should submit an enlisted personnel action

request (NAVPER 1306/7) citing NAVOP 065/89 as a reference, with command endorsement to CNMPC (NMPC-461E) with a copy to EPMAC by April 30, 1990. Non-designated seamen, airmen and fire-

men should submit a navgram request with command endorsement to EPMAC INFO CNMPC (NMPC-461E). The final decision for all requests will be based on individual desires, command readiness and fleet balance.

ANNUAL INTIMATE APPAREL SALE. SAVE 25-50% OFF.

Thanks for all the great bargains.

Saturday

SIDEKICKS IN SILHOUETTES-Vignettes of the Old West featuring NWC employees in dramatic acting debuts. Co-sponsored by Maturango Museum and NWC. At the Museum from 3 p.m. to 4 p.m.

Dr. Cuaron to keynote

Keynote speaker for American Heritage Week, Dr. Alicia Cuaron will deliver several dynamic motivational speeches.

She will discuss the Hudson Study "Workforce 2000" on June 6 and 7. Sessions on Tuesday, June 6 are set for 8 a.m. and 1 p.m. at Michelson Laboratory and on Wednesday, June 7 at 8 a.m. and 1 p.m. at the Training Center, Room 114.

Supervisors will receive EEO credit for attending Dr. Cuaron's lecture.

"Workforce 2000" is a study which predicts what the profile of the workforce will look like in the year 2000. She will also be addressing this topic at the Equal Employment Opportunity Awards ceremony on Tuesday evening at the Seafarer Club.

Her lecture is titled, "Working with a diverse and multicultural population for self-enhancement, interpersonal communication, career development and leadership preparation."

A nationally acclaimed motivational lecturer, her dynamic lectures emphasize positive imagery, goal setting and planning for personal and professional development in America's rapidly changing workplace.

She is president of Curraon & Gomez, Inc., a national corporation specializing in Facilities Management, ADP Network Systems Development and Human Resource Development.

Dr. Alicia Cuaron

She firmly believes that business and civic involvement contribute to a higher quality of life for all of its citizens. On the national level, she has served on the National Board of the League of United Latin American Citizens (LULAC) as National Director of Education, Leadership and Economic Development. She has also performed leadership roles for the National United Way Hispanic Leadership Program; American Red Cross Western Regional Hispanic Initiative; National Hispanic Senior Citizens Foundation; Child Welfare League of America; Mexican American Women's National Association; Kellogg Fellow, Institute for Educational Leadership; Phi Delta Kappa; and the National Hispanic University, Comerciantes Business Entrepreneurial Program for Youth.

Did You Know.....

Garlic, used since ancient times by the Chinese, Egyptians and Hebrews is the strongest-flavored member of the onion group. As a seasoning and as a reputed medicine, it has exerted a powerful influence (in more ways than one) over people around the world. Garlic was once used to ward off evil; it is still believed to prevent colds.

Checkpoint 1988 recalls participants heritages

'Checkpoint 1988' is a dramatic presentation which examines the individual circumstances of women in three generations as they progress through changing social patterns.

Further, it honors the many women -- and men -- who left the ties of their native cultures, their families and friends and sought to make new lives in a new and different land.

Doris Smith Naundorf makes the story of three generations come alive with her stimulating interpretation and costume changes. Her audiences are able to connect with their own past heritage while her own story unfolds.

Her presentation is an excellent way to kick off the week's activities. Her presentation is scheduled for Monday, June 5 at Michelson Laboratory (Room 1000D) at 9:30 a.m. and 2 p.m.

Doris Smith Naundorf portrays her grandmother Luise Gysin Luscher.

GOOD OLE USA DAY

Choose from the following offered at the food booths in front of the Administration Building from 11 a.m. to 1 p.m. on Tuesday, June 6: Corn on the Cob, Submarine Sandwiches, Assorted Salads, Chili/hotdogs, Ice Cream Sundaes, BBQ ribs/chicken/potato salad, Sloppy Joes, Texas Taco Salad, Beans & Ham/Corn Bread, Homemade Pies, Baked Potatoes with toppings, and "Soda on the Run."

More training opportunities.....

Dr. Suzanne Hard will discuss How Women Access Personal Power at the Training Center on Monday, June 5 from 8 a.m. to 4 p.m.

Dr. Suzanne Hard will discuss Leadership Strategies using native philosophies at the Training Center on Tuesday, June 6 from 8 a.m. to 4 p.m.

Awards to be given at EEO Ceremony

Awards will be presented to individuals who have best demonstrated the Center's goals in the area of equal opportunity and affirmative employment and to the department which demonstrated outstanding commitment to those goals at the EEO Awards Ceremony on Tuesday, June 6.

To be held at the Seafarer Club at 6 p.m., the evening will include a no-host "social hour" and heavy hors d'oeuvres. Entertainment will be provided by "Rhythms of the Village" and the Ridgecrest Community Jazz Band.

Tickets for the evening's event are \$6 if purchased today from a department representative. They will also be available at the door for \$7.

AMERICAN HERITAGE

Entertainment highlights

All-American Day Tuesday, June 6

Ahhaitty Red Tipi Dancers will perform during lunch on stage in front of the Administration Building.

Hailing from Hacienda Heights, CA, these native American dancers emphasize the Southern Plains style (Commanche).

International Day Wednesday, June 7

Rhythms of the Village is a unique African Dance and Theater Company which incorporates dances, songs, masquerade and stories derived from the art form and village life of Nigeria. The audience is involved in all areas of the performance.

Their overall message is universal: "When the sun sets on productive festivities of the village, we know it will rise on universal happiness."

In addition to performing on stage in front of the Administration Building during lunch on Wednesday, the group will entertain at the EEO Awards Ceremony on Tuesday evening.

AUTHENTIC COSTUMES—Members of the "Rhythms of the Village" perform a native Nigerian dance. The group encourages audience participation and is eager to expand understanding of the African village culture.

PAST CELEBRATIONS—China Lakers enjoy the feast at the Food Booths during the 1987 American Heritage Week.

WORKFORCE 2000 (2.5 hours)
6-7 June; Tuesday-Wednesday, 0800-1030 or 1300-1530; Mich Lab Room 1000D, Tuesday; Training Center, Room 114, Wednesday. By: Dr. Alicia Cuaron.

Scope: Dr. Cuaron will discuss the Hudson Study "Workforce 2000," which predicts what the profile of the workforce will look like in the year 2000. Topics will include Implications of the Study:

- For the employers
- For the employees
- Multicultural Awareness:
 - A study of culture and diverse lifestyles
- Women in the Workforce (Training):
 - Career development
 - Leadership development
 - Communication and interpersonal skill development
 - Employee relations
 - Motivation
 - Quality and productivity

Supervisors will receive EEO credit for attending this class. There will be a sign-up list. As space is limited, arrive early to guarantee a seat. There will be four separate sessions covering the same material.

Sidekicks In Silhouettes

In honor of American Heritage Week, the Maturango Museum is hosting a special event on June 10.

Linda Lou Crosby and Ricky Parks will present a theatrical story hour that Saturday from 3-4 p.m. It will be an hour filled with action-packed tales about true-life characters from the Old West.

Characters like Nat Love (Ricky Parks), "The Black Rider of the Black Hills" (also known as Deadwood Dick), the gentleman bandit Tiburcio Vasquez (Tony Garcia), who prowled Walker Pass hiding out at Robbers

Roost, Kazuko Hayashi (Ann Kuratori), Leland Chin, who vividly remembers the San Francisco earthquake, Sarah Winnemucca, author of "Life Among the Piutes, not to mention "Shady Sadie" (Kathy Kraft), "Stagecoach" Mary Fields and other desperados, dandies, and damsels. All these wonderful characters spiced up our past with their penchant for the dramatic, their stick-to-it-iveness, and their general pioneering spirit. All are a part of our own diverse American Heritage.

For further information, contact the Maturango Museum at 375-6900.

INTERNATIONAL DAY

Choose from the following offered at the food booths in front of the Administration Building from 11 a.m. to 1 p.m. on Wednesday, June 7: French Desserts, Schwarma/Falafel Pitas, Tacos/Refried Beans, Cajun Chicken/Dirty Rice, German Sausage/Sauerkraut/Dark Bread, Italian Spaghetti/Bread/Salad, Tapa Burritos/Benuellos/Mexican Coleslaw, Baked Potatoes with international toppings, Ice Cream Sundaes from around the world, Indian Stuffed Green Peppers/Fried Rice, Russian/Swedish/Mexican/Hawaiian & French Meatballs and "Soda on the Run"

"Capture The Moment"

Picture yourself in the Hawaiian Islands by having your photo taken with a life-sized prop of a Hawaiian native. Or maybe you'd prefer to share the camera with a cowboy or a can-can girl. Traditional photos can also be taken. The color 5x7 photographs, taken by Code 38, will be \$5.

Hunter Safety Class scheduled

Tuesday, June 6, is the last day to register for the Hunter Safety Class being offered by the Sierra Desert Gun Club of Ridgecrest. This two-day school will be conducted on Saturday and Sunday, June 10 and 11.

All first-time purchasers of a California hunting license must provide proof they have received training in firearms safety, sportsmanship and game management and conservation from a certified Hunter Safety

instructor. Upon successful completion of such a training course, the student receives a validated Hunter's Safety Certificate which must be presented to the licensing agent when purchasing a California hunting license.

This school is open to all residents, over the age of 12 years, of the Indian Wells and Searles valleys and surrounding areas. The class involves approximately 16 hours of classroom

instruction, including a one-hour written final examination.

Registration is required and will be taken in the lobby of the Ridgecrest Police Station on Saturday, June 3, from 9 a.m. to 1 p.m. and on Tuesday, June 6, from 7 to 9 p.m. A \$5 registration fee will be collected at this time.

This will be the first of two Hunter Safety classes conducted this summer. The last class will be held during late August.

WAITING—First time hunters must take a Hunter Safety Class prior to receiving their hunting license. Class is limited, so be sure to register early.

Windy days and low water levels don't discourage anglers from trying

Despite some windy days, low water levels and cold nights, a large number of anglers are trying their luck. At a tournament held recently at Crowley Lake, the winning fish was 3 pounds 7 ounces.

According to the Bishop Chamber of Commerce, fishing in the streams in the Lone Pine area is very good for planters on power bait, salmon eggs

and worms. Diaz Lake has been releasing lots of cat fish at night.

The river has been slow in the Big Pine area, however, crickets have been catching some browns. Limits of browns are being taken from Big Pine Creek by fishermen using power bait or worms.

In the Bishop area, North and South lakes are on the rise and fishing

is picking up for pan-size brookies and little browns. Worms are working the best. On the back side of the lake, Sabrina is doing good on worms and power bait. Bishop Creek and Intake 2 are also doing good on worms and power bait. Sabrina, Bishop Creek and Intake 2 are now being stocked weekly.

Pleasant Valley Reservoir has been

good for rainbows and browns, 14 to 18 inches. Use power bait and worms for rainbows and lures and crickets for browns.

Super dupers, Kastmasters and White Rooster Tails, power bait, worms and night crawlers are best for Rock Creek Lake. For streams at Mosquito Flats, use black ants, nymphs and lures.

Up to 3- to 4-pound rainbows are being taken on power bait and worms in the Convict Lake area. When the weather permits, fly fishing is doing well in the streams.

Power bait, cheese, salmon eggs, and night crawlers are working at Crowley Lake. Bait fishing is slow. (Continued on Page 18)

Weather doesn't stop fishermen...

(Continued from Page 17)

Trotting is best with flat fish and repala with flashers. Trotting at 3-5 colors is catching better-in-size than average fish. The upper Owens River has special conditions for fishing in effect — a barbless hook, no bait, two fish (18" or over) limit.

Lake Mary, Lake George and Twin Lakes (Mammoth Lakes area) are doing good on power bait. Twin has been best for fly fishing from float tubes. An average of 10"-fish have been coming from the streams on

crickets and worms. The catch and release action on the Upper Owens River isn't bad, nymphing seems to be getting the best results.

June and Gull lakes are doing good on power bait, eggs and worms. Trotting with 5-7 colors on June is good, while trotting with 3 colors on Gull is successful. Fishing at Rush Creek is picking up, with 10 to 12" rainbows being caught on eggs and worms.

Anglers are doing well at Bridgeport Lake. Trotting with broken back repala and float tubing on the back

side with leech patterns seem to be bringing in fish, each weighing an average of one pound. There is big fish activity on the Lower Twin, up to 14 pounds. Small olive woolly bugers and hornberg specials are best for pan-size fish. Virginia Lakes are almost ice free — power bait and worms are best when the weather permits fishing. Panther Martin spinners and power bait are catching pan-size rainbows at Robinson Creek. At Carmen Lakes, the weather is influencing whether the fishing is good or bad.

Activities begin next week with a walk/run

American Heritage Week activities will start with a bang as a stream of runners, walkers, parents and children participate in the first annual American Heritage Week Fun Run/Walk. The fun begins on Monday at 12 noon.

Beginning and ending at the Officers' Club, the walk/run will continue east on Lexington down to Blue Ridge Road and east on Oiled Road, towards the stables, and back again.

The entrance fee is \$8 per entrant, and must be paid, in cash, when registering for the race. To save registra-

tion time, participants are asked to bring the completed entry form (below) to booths located in front of the Officers' Club on the day of the race between 11 and 11:45 a.m.

All entrants will receive a t-shirt and be entered into a general drawing for prizes.

The first three overall male/female winners will receive awards and refreshments will be available to all participants.

This run is just one of the many activities planned for American Heritage Week, June 5-10.

American Heritage Week 5K Run/Walk

Bring completed entry form along with \$8 entry fee (cash only please) on the day of the race.

and off-center customers. Experience using the Macintosh SE and CCP experience are highly desirable. Incumbent must be able to obtain and maintain a Secret Clearance. **No. 62-035 Secretary, DG-318-3/4, Code 62** - Provides secretarial and administrative support to the Department Head and Associate Department Head of the Range Department. Experience with the Macintosh II is desirable. Promotion potential to DG-4.

Reassignment opportunities

This column is used to fill positions through reassignment only. For this reason, the Reassignment Opportunity Announcements are separate from the Promotion Opportunities column in the Rocketeer. Applications will be accepted until the date stated in the announcement. Employees whose work history has not been brought up to date are encouraged to file an SF-171 or 172. All applicants must meet minimum qualification requirements established by the Office of Personnel Management. Information concerning the recruitment and placement program and the evaluation methods used in these reassignment opportunities may be obtained from Personnel Management Advisors (Code 096 or 097). Applications should be filed with the person whose name is listed in the announcement. The Naval Weapons Center is an Equal Opportunity Employer.

No. 27-011, Interdisciplinary (Electronics Engineer/Mathematician/Computer Scientist), DP-855/1520/1550-2/3, Code 2722 - This position is located in the Scientific Computing Facility (SCF) Operations Office. Code 2722 is responsible for operating GRAY-XMP EA/116, CONVEX C210, Alliant FX80, and DEC VAX computers, operating under UNIX and VMS, at various classification levels for S&E users at NAVWPNCEN. Incumbent performs the duties of a VAX/VMS System Manager with emphasis on supporting graphics software and hardware (75%); installs and supports DISPLA, and PLOT10, assists SCF users with FORTRAN calls to these products, provides backup support for graphics products on Code 2721 Visualization Lab workstations. Incumbent installs and provides System Manager support for INGRES (10%). Incumbent develops printing and plotting command routines and provides device support for SCF and a wide variety of user printers and plotters (15%). This position may require some physical

labor, i.e., lifting floor tiles and tracing cables. Travel for training and conferences is required. Please send updated SF-171 to Roy Boswell, Code 2722, NWC ext. 3169. **No. 31-039, Interdisciplinary, Electronics Engineer/Physicist, DP-855-1310-2/3, Code 3158.** This position is in the Target Recognition Systems Branch, Targeting Division, Weapons Systems Integration Department. The work to be performed is the development of algorithms for signal and image processing, and for pattern and image recognition associated with automatic target recognition technology. Applicable sensors for these algorithms development work include Inverse Synthetic Aperture Radar, Laser Radar, and advanced RF missile seekers. Growth in the position will involve some project direction and leadership of a small team of scientists. Assessment of related technology developments in industry will also be required. Three to five years experience in signal processing with background in radar sensors and ability to program in FORTRAN is preferred. To apply, send current SF-171 to A. Campbell, Code 3158, NWC ext. 3531.

No. 32-034, Interdisciplinary (Mechanical/Aerospace Engineer), DP-830/861-2/3, Code 3271, Two vacancies - This position is located in the Missile Performance Branch of the Propulsion Systems Division, Ordnance Systems Department. The branch conducts analysis, generates conceptual designs, and performs computer simulations of missiles and other aeropropulsion vehicles to determine vehicle flight performance capability and sensitivity to propulsion system operating characteristics and type (rocket and/or airbreather). The incumbent carries out analyses, simulations, and/or studies in the above areas as a member of an analysis team or for a task sponsor. Applicants should have an interest in analysis and computer simulation, a basic engineering knowledge of propulsion and aerodynamics. A knowledge of FORTRAN would be helpful. The position involves contact with sponsors, contractors, and other government organizations for the purpose of planning, reporting, and exchanging technical information. Occasional travel will be required. To apply, send a current SF-171 to Hal Larsen, Code 3271, NWC ext. 7412.

No. 32-035, Interdisciplinary (Mechanical/Aerospace Engineer), DP-830/861-2/3, Code 3273 - This position is located in the Systems Technology Branch of the Propulsion Systems Division. The incumbent will be responsible for the design, development and evaluation of missile flight control actuation, and propulsion subsystems. The effort involves hands-on hardware work

relating to both major missile development applications and technology base programs and includes definition and coordination of missile hardware and software interfaces with the Navy's Vertical Launcher System. To apply, send a current SF-171 to John Robbins, Code 3273, NWC ext. 7368. **No. 32-034, Interdisciplinary (Mechanical/Aerospace Engineer), DP-830/861-2/3, Code 3271, Two vacancies** - This position is located in the Missile Performance Branch of the Propulsion Systems Division, Ordnance Systems Department. The branch conducts analysis, generates conceptual designs, and performs computer simulations of missiles and other aeropropulsion vehicles to determine vehicle flight performance capability and sensitivity to propulsion system operating characteristics and type (rocket and/or airbreather). The incumbent carries out analyses, simulations, and/or studies in the above areas as a member of an analysis team or for a task sponsor. Applicants should have an interest in analysis and computer simulation, a basic engineering knowledge of propulsion and aerodynamics. A knowledge of FORTRAN would be helpful. The position involves contact with sponsors, contractors, and other government organizations for the purpose of planning, reporting, and exchanging technical information. Occasional travel will be required. To apply, send a current SF-171 to Hal Larsen, Code 3271, NWC ext. 7412.

No. 39-032, Interdisciplinary (General/Mechanical/Electronics/Aerospace Engineer), DP-801/830/855/861-3, Code 39B8 - This position is located in the Sparrow Project Office. Incumbent serves as Project Manager of the Sparrow Product Improvement Program and will provide programmatic direction and coordination to a major product improvement program on the AIM/RIM-7 missile. The incumbent will also provide direction to matrix support organizations, insure contractual compliance, (Continued on Page 21)

Secretarial opportunities

This column is used to announce secretary positions for which the duties and job relevant criteria are generally similar. Secretaries serve as the principal clerical and administrative support in the designated organization by coordinating and carrying out such activities. Secretaries perform numerous tasks which may be dissimilar. Positions at lower grades consist primarily of clerical and procedural duties and, as positions increase in grades, administrative functions become predominant. At the higher levels, secretaries apply a considerable knowledge of the organization, its objectives and lines of communication. Depending on grade level, typical secretary duties are implied by the job relevant criteria indicated below.

Applicants will be rated against four or more of the following job relevant criteria: (1) ability to perform receptionist and telephone duties; (2) ability to review, track, screen and distribute incoming mail; (3) ability to review outgoing correspondence; (4) ability to compose correspondence and/or prepare non-technical reports; (5) knowledge of filing systems and files management; (6) ability to meet the administrative needs of the office; (7) ability to train clerical personnel and organize workload of clerical staff processes; (8) ability to plan and coordinate travel arrangements; (9) ability to maintain and coordinate supervisor's calendar and to arrange conferences.

Unless otherwise indicated, applicants for branch secretary will be rated on elements 1/2/3/5/8; division secretary applicants will be rated on elements 1/2/3/4/7/8/9; Program Office secretary applicants will be rated on elements 1/2/3/4/5/8/9; and department secretary applicants will be rated on elements 4/7/8/9. A SUPPLEMENTAL FORM IS REQUIRED AND MAY BE OBTAINED IN ROOM 100 OF THE PERSONNEL BUILDING.

No. 34-016, Secretary (Typing), DG-318-1/2, Code 345 - This position is located in the Photographic Division of the Technical Information Department. The incumbent provides secretarial support to the Division Head, Administrative Officer, and two Branch Heads. The incumbent needs to be able to plan and coordinate complex travel arrangements. PC experience is desirable. Promotion potential to DG-2, but not guaranteed.

Department. The incumbent provides secretarial and administrative support to the branch. Must be able to obtain and maintain a secret clearance. Word processing experience is highly desirable. Experience with the Macintosh computer is preferred. Promotion potential to DG-2. Status eligibles may apply. Previous applicants need not reapply.

No. 62-023, Secretary (Typing), DG-318-1/2, Code 6251 - This position is located in the Computer Systems Branch, Data Systems Division, Range

No. 62-034 Secretary (Typing), DG-318-1/2, Code 62C - The incumbent provides secretarial and administrative support to the Head, Projects Office. Position involves considerable interaction with all levels of management

OPEN HOUSE Saturday, 11-4 Sunday, 12-4 637 GLEN CT. W. Upjohn

Demo Project has been extended for second time

For the second time, the joint NWC/NOSC Personnel Demonstration Project, implemented July 1980, has been extended. The project is now authorized to continue until Sept. 30, 1995. The Civil Service Reform Act of 1978, which allowed the Center's Personnel Demonstration Project, limited each project to five years; thus requiring extension, cancellation or permanent status of the program at the end of the five-year time limitation.

The general purpose of the project is to demonstrate other systems of personnel management that might be more effective than the current civil service system. Overall evaluation of NWC's project is positive and other agencies are using it as a model for experimenting with similar projects. Other current projects are briefly described below.

In addition to serving as a model for other agencies, the principal features of the Navy project have been the basis for several legislative proposals. The proposals would have extended new personnel systems to various civil service populations, had they passed.

Other demonstration projects— McClellan Air Logistics Center in the Department of Air Force is testing a gainsharing program implemented February 1988 in its Directorate of Distribution. Features of this program include a streamlined personnel system with job series consolidation, pay-banding, an on-call appointment program for 25% of the future workforce, and the elimination of individual performance appraisals.

The National Institute of Standards and Technology, Department of Commerce, is testing many of the same ideas that NWC is testing, and has added broader hiring authorities,

employee ranking for performance appraisals, supervisory pay differentials, recruitment and retention bonuses, and sabbaticals.

The Federal Aviation Administration, Department of Transportation, has developed an Airway Science Curriculum which is being tested under the demonstration project regulations. This was implemented in 1983 and extended to 1992. FAA also has an approved (but not implemented) proposal to test retention allowances for difficult-to-staff positions.

There are six additional projects under consideration and another approved, but not implemented. Several others are being formulated by various agencies. Since the Civil Service Reform Act of 1978 allows only 10 active projects at any one time, not all will be able to operate at the same time without a change in the law.

For more information about the Demonstration Project, contact Nancy Crawford at NWC ext. 3196.

and provide technical support/advice to off-center sponsors. Expertise in development and production is desired. Previous applicants need not reapply. To apply send current SF-171 to Dave Eiband, Code 39B8, NWC ext. 2630.

No. 39-050, Interdisciplinary (General/Mechanical/Electronics/Aerospace Engineer/Physicist), DP-801/850/855/861/1310-3/4, Code 39B1 - This position is that of a Systems Engineer for a developmental program in the Advanced Technology Applications Office, Amair Projects Office, Intercept Weapons Department. Must possess a strong background in RF, IR and Avionics. Ability to obtain a Top Secret clearance with SBI required. To apply, send updated SF-171 to Tom Hamilton, Code 39B1, NWC ext. 1445. Promotion potential to DP-4, but not guaranteed.

No. 62-036, Interdisciplinary (Electronics Engineer/Physicist), DP-855/1310-1, Code 6213 - This position is located in the Instrumentation Branch, Ordnance Test & Evaluation Division, Range Department. Incumbent is responsible for instrumentation systems design, including analog and digital data systems, CCTV systems, control systems, intercommunication systems, timer/sequence systems, weather systems, data recording and display systems. Knowledge of PC computers and scientific programming

languages desired. Incumbent must be willing to learn to use PC computers in data systems designs (hardware and software), project management, and word processing. Must be able to communicate effectively both orally and in writing. Promotion potential to DP-3 level. Send current SF-171 to L. Lebow, Code 6213, NWC ext. 7404.

No. 64-022, Electronics Engineer, DP-855-2/3, Code 64211 - This position is located in the Instrumentation Section, Instrumentation Design Branch of the Telemetry Division. This section provides the necessary support for the design, fabrication and field support of telemetry systems and related instrumentation as applied to weapons and parachute related recovery systems. Incumbent will have responsibility for design and development of telemetry systems for branch programs. Areas of support will include component testing, system testing, development of test procedures, integration testing, and captive and live firing test support. Incumbent must have experience with or knowledge of FM/FM and PAM/PCM telemetry systems. Incumbent must be able to communicate effectively with all levels of Center management. Promotion potential to DP-3 if filled at the DP-2 level. To apply send an updated SF-171 to Randy Morris, Code 6421, NWC ext. 3761/3762. Previous applicants need not reapply.

Instructors being sought

Cerro Coso is instituting a new program leading to an Associate of Science Degree in Quality Assurance. Courses that will be initiated in the coming year include Introduction to Quality Control, Fundamentals of Non-Destructive Testing, Basic Metallurgy and Reliability.

Courses to be offered in subsequent years include Principles of Quality Improvement, Statistical Process Control, Metrology/Mechanical Inspection, Electronic Inspection and Software Quality Control.

Anyone interested in teaching any of these classes should send a resume to, or contact, Dean Paul Riley at Cerro Coso Community College, 375-5001.

Visit planned

Dr. Orlando Madrigal of Cal-State University Chico will be on-Center June 30 to advise current and prospective students in the external degree programs offered by the school.

Cal-State University Chico has external degree programs in computer science which lead to bachelor's and master's degrees. Those who wish to see Dr. Madrigal are asked to make an appointment by telephoning Helen Benes, NWC ext. 2648.

CSUB academic counselors advise prospective students

Academic counselors of Cal-State Bakersfield will be on-Center Friday, June 2, to advise current and prospective students in the external degree programs offered by that school.

External degree programs offered at NWC by Bakersfield include a bachelor's degree in business administration and a master's degree in administration. Bakersfield also provides math courses in other external degree programs at NWC.

Those who wish to see one of the academic counselors are asked to make an appointment by telephoning Helen Benes at NWC ext. 2648.

No. 6 Now In Print

THE ALBUM
Times & Tales of Inyo-Mono

The sixth issue (Vol. II, No. 2) of "The Album, Times and Tales of Inyo Mono," is now available.

Please Note: a limited number of copies of the premier issue (Vol. 1, No. 1) have been re-printed, for those who want the whole collection.

This second 1989 issue of "The Album" tells the rest of the story of the California-Nevada border, and a touching recall of a rare Chalfant Press correspondent. Other articles include a hunting story with illustrations available in the form of gift cards, a summer memory, a sentimental surprise page, a photo essay illustrating Israel Russell's exploration of Mono Valley, and a new series by a pair of Churchmice.

Available in local stores, museums, visitor centers and Chalfant Press at \$2, \$3 by mail, \$12 (4 issues) subscription.

COOKS • SUPERVISING COOKS CORRECTIONAL FACILITY

The California Correctional Institution, Tehachapi, tests for cooks and supervising cooks on an as-needed basis throughout the year.
Our needs are IMMEDIATE
Minimum qualifications for Supervisors. Two years of experience performing duties of a Cook II (Correctional Facility) or a COOK II.

OR
One year of experience in a supervisory capacity assisting with the preparation, cooking & serving of meals for at least 250 persons a meal, and equivalent to completion of the eighth grade.

These positions are open to women and men. Applications will be accepted on a continuous basis. If you are separating from the military during the upcoming year, and qualify to fill any of the above positions, send completed state application form #678 (include your discharge date on form), available at state offices to:

C.C.I.
PERSONNEL OFFICE
P.O. BOX 1031
TEHACHAPI, CA 93561

You will be notified when to apply for the next available exam. CCI encourages women and minorities to apply.

AAEOE

Employees need co-workers to generously donate leave hours

Employees indicated below have been approved to become leave recipients under the Leave Transfer Program. These employees have exhausted annual and/or sick leave because of personal emergencies and will be in a non-pay status for at least ten days. Employees who wish to donate annual leave to the employee should fill out the form at the end of this column, clip it out and send it to Code 221. For more information about this program, call NWC ext. 2018.

Robert Donsbach, Specification

Writer/Editor, Code 3656 — suffered a heart attack on May 4 and will be unable to return to work until July 1.

Michael Phillips, Student Trainee (Computer Scientist), Code 2803 — has had repeated surgeries for recurring tumors of the knee, which have led to two replacements of the knee joint.

John Hill, Engineering Data Management Specialist (Code 3654) — has intestinal problems, including internal bleeding, which have led to anemia and long term

absence from work.

James H. Lewis, Model Maker (Code 3645) — has been unable to work since July of 1988 due to an infection of the spine followed by spinal fusion.

Linda K. Dittmeier, Computer Specialist, Code 2771 — has used all her available annual leave caring for her husband during his long-term fight with cancer.

Joan A. Johnson, Secretary, Code 3592 — needs annual leave to care for her husband who is being treated for cancer.

Leo Montano, Visual Information Specialist, Supervisor, Code 3441 — is recovering from radical cancer surgery performed in February.

Sarah Polak, Computer Specialist, Code 35604 — has cancer and is undergoing chemotherapy.

Museum plans several events

Maturango Museum's Summer Program will be held at the museum, 100 E. Las Flores Ave., June 14-16 and 19-23, and in the Kennedy Meadows area on Saturday, June 17. Children who are pre-4th and pre-5th graders are invited to join the activities. Topics and field trips planned range from gold mining to treasure hunts, Indian games to flower arranging, raptors to pot making, and safety in the desert to flapjacks. Several field trips are planned on weekdays, as well as the all-day field trip including the families on June 17.

The program will be from 8:30 to 11:00 a.m. on most days, but may vary some on field trip days. Dates and times of the field trips will be announced on the first meeting day. There will be a fee of \$20 for museum members and \$30 for non-members. Register your child at the museum office Tuesday through Friday. The group will be limited to 25 children.

Look for Navy News This Week, the Navy's weekly broadcast of Navy news around the world, on Channel 3 (Desert Cable TV) Friday evenings at 6:30 and 10:30 p.m.

Soldering courses set in near future

Two 40-hour high-reliability soldering courses will be held in the near future at 543 Graaf Street. These courses are for government personnel needing certification to DOD-STD-2000 as inspectors or operators.

The first course will be held June 26-30 and the second course

will be July 10-14.

The requirements for the courses are (1) previous soldering experience and (2) a current eye examination.

To be scheduled into a class, contact Soldering Technology Training, Code 36812, at 446-5571.

CSRS employees can add to their benefits

NWC employees covered by the old Civil Service Retirement System may be able to contribute extra dollars to their pension plan that will beef up their retirement annuity.

Some two out of three federal employees are eligible. Employees covered by the new Federal Employees Retirement System or if they owe a deposit or redeposit for civilian service are not eligible. Also, if an employee received a refund on voluntary contributions, he/she cannot make them again unless he/she had a break in service of more than three calendar days after getting the refund.

The voluntary contribution option has been available for years, but has recently become more attractive due to a higher interest rate — 9.125 percent in 1989. The Treasury Department determines the interest rate each calendar year. The interest earned on the contributions is not taxable until retirement and the retiree begins collecting an annuity or until the employee withdraws his/her contribution.

Making voluntary contributions does not conflict with the tax-deferred Thrift Savings Plan. The voluntary contribution option is most attractive to those who have already participated in the Thrift Savings Plan to the maximum allowable extent.

Employees keeping voluntary contributions in the retirement system, each \$100 (including the interest earned) will increase their annuity by \$7 a year. This annuity increases by 20 cents for each full year over the age of 55 when an employee retires. Thus, if an employee retires at 60, each \$100

will purchase \$8 a year of additional annuity. Because employees can contribute up to 10 percent of their basic civilian salary received since Aug. 1, 1920, this can add considerably to their pension.

Contributors can withdraw all (not just some) voluntary contributions with interest at any time before receiving an additional annuity based on these contributions. (Remember, withdrawing closes the account and cancels contribution eligibility unless there is a subsequent break in service.) Any interest earned on the account would be taxable in the year the withdrawal is made.

Should a contributor die before receiving an annuity, the voluntary contributions account, plus interest, will be paid to the contributor's designated survivor(s) as a lump-sum payment.

Only contributions in multiples of \$25 (\$25, \$50, \$75, etc.) will be accepted. Contributors cannot use payroll deduction.

To enroll, simply file a Standard Form 2804 (Application to Make Voluntary Contributions) with the Office of Personnel Management. After the application is approved, the Office of Personnel Management will assign an account number and send instructions for making contributions. Do not send money with the application. Contributions will not be accepted until the application is approved.

Standard Form 2804 may be picked up from Personnel Management Advisors (PMA). For additional information on this savings program, contact your PMA.

Personnel development opportunity

Security for Clerical/Administrative Workforce (6 hours)

July 19, 0800-1430, Training Center. By John Hammonds.

Intended Audience: Clerical/Administrative.

Scope: This course covers badging and area access procedures; procedures for new employee security clearances; how to arrange for visitors, both foreign and domestic; how to mark and safe-guard classified documents; transmission of classified documents; destruction of classified documents; courier cards, letters and memos; and how to get keys made and locks/combinations changed.

Deadline: July 6.

Microsoft Word on the Macintosh (14 hours)

June 21-22, 0800-1600, Training Center. By Donnie Goettig.

Prerequisite: Experience using the Macintosh Computer. Can create folders, initialize disks, copy disks and files and use the clipboard.

Intended Audience: Users of Macintosh Computers who desire to learn the fundamentals of the Microsoft Word Program.

Scope: Students will learn how to use the Microsoft Word Program to create documents; move text between files using the clipboard and glossary; add, change and delete text format using font and format; use the spell checking facility; and paginate, print and save documents.

Note: Participant must certify on the enrollment form that he or she meets the prerequisite for this class.

Deadline: June 9.

Self-study

How to Speak Up, Set Limits and Say No (Without Losing Your Job or Your Friends) (6 hours)

Open enrollment, self-study. Scope: Stand up for yourself with

these specific skills: How to find the balance between standing firm and giving in; What to do if someone takes credit for your work; What to do when you're being ignored; A polite, yet no-nonsense way to handle people who constantly barge in and interrupt your work and concentration; How to let go with dignity when you're in a hopeless situation.

Method: Audiocassette.

Source: Training Center.

Enrollment Form: 12410/73.

Image and Self-Projection (For Today's Women in Business, Government and the Professions) (4 hours)

Open enrollment, self-study. By Julie White.

Scope: Topics are: Stand Up to Conflict — Confrontations are a normal part of business life. With this program, you'll learn when to confront, and how to handle confrontations in a way that maintains, and even increases, your power. Project a Stronger Image — Some women exude authority and charisma the minute they walk in a room. Image & Self-Projection will show you how to project powerful messages and create an aura of self-assurance. Communicate With Impact — Your success depends on two factors: 1) what you know, and 2) how well you put it across. The blunt fact is that the second factor often matters more than the first. Build Your Personal Power — Like most women, you were probably raised to support power, not exercise it. Now you can make up for lost time. The skills you learn with Image & Self-Projection will help you project power positively and comfortably. Work Effectively With Men — Now you can learn how to overcome, and help men overcome, the barriers to male/female collaboration, plus some ideas for dealing with women who resist your power. Be Seen, Get Known — It's a simple

law of business: If you want to get ahead, you have to make people notice you. Learn how to maximize the recognition you get for the work you do (and not come across as pushy).

Presentation Methods: Audiocassette.

Note: To check out this tape, submit NWC Form 12410/73 to Code 094 via department channels.

Power Communication Skills (Political Savvy and Leadership Skills for Women) (4 hours)

Open enrollment, self-study. By Susan Dellinger

Scope: In this program, you'll learn: 1) beyond assertiveness — how to move to the next step, power; 2) how to orchestrate it all — the look, the walk, the voice, the words — into one powerful package; 3) how promotion decisions are really made (and how to get them made in your favor); 4) the three conflicts you must avoid; 5) Executive strategic planning made simple; 6) What "teamwork" really means; 7) why you don't get the whole truth in your performance evaluations; 8) how to avoid the ten most common blunders that sabotage many women aiming for the top; 9) "Die before cry" — escape hatches that work; 10) cleaning up our own act: women working with women; plus, specific strategies for dealing with a tough boss, negotiations, crises, meetings and much more.

Presentation Methods: Audiocassette.

Note: To check out this tape, submit NWC form 12410/73 to Code 094 via department channels. Relationship Strategies (How to Deal With the Differences in People) (18 hours)

Open enrollment, self-study.

Scope: This program is designed as a simple tool which can be used easily and applied readily to improve business and interpersonal relationships. It is not designed as an

in-depth psychological examination of human behavior, but rather as a simple way of observing and understanding the differences in people through their behavior.

Presentation Methods: Audiocassette.

Enrollment Form: 12410/73.

How to Listen Powerfully (4 hours)

Open enrollment, self-study.

Scope: How to Listen Powerfully is designed specifically for people in business. This tape program is packed with tools and techniques you can use immediately — when

facing conflict, participating in meetings, giving and getting instructions, making agreements — all through the business day. You'll learn how to communicate clearly, with fewer mistakes; use the telephone to its greatest advantage; increase your memory for facts and names; listen in a way that builds trust and cooperation; and perceive the whole message and the real meaning; plus many more strategies for increasing your listening power.

Presentation Methods: Audiocassette.

SUPER SINGLE, SUPER STYLE

Savage 650

2 NEW '86 Models \$2,326
1 NEW '87 Model \$2,640
Tax, lic., doc. included (out the door)

Sometimes, single is better. Like the simple elegance of the single-cylinder engine on the Suzuki Savage 650. The 652cc, 4-stroke comes to life at the push of a button, pulling power from the Twin Swirl Combustion Chamber to the low-maintenance belt drive. The thickly padded, low-slung seat and rich paint complete the stylish cruiser look. Cruise on in and see the Savage 650 — it's "Right On, Suzuki."
